Approaches to Studying the Enacted Mathematics Curriculum Kathryn Chval, Dan Heck, Iris Weiss, Steven W. Ziebarth, 2012-09-01. Curriculum materials are among the most pervasive and powerful influences on school mathematics. In many mathematics classes, student assignments, the questions the teacher asks, the ways students are grouped, the forms of assessment, and much more originate in curriculum materials. At the same time, teachers have considerable latitude in how they use their curriculum materials. Two classes making use of the same materials may differ markedly in what mathematics content is emphasized and how students are engaged in learning that content. This volume considers a variety of research tools for investigating the enactment of mathematics curriculum materials, describing the conceptualization, development, and uses of seven sets of tools. Mathematics education researchers, curriculum developers, teacher educators, district supervisors, teacher leaders, and math coaches will find insights that can improve their work and guidance for selecting, adapting, and using tools for understanding the complex relationship between curriculum materials and their enactment in classroom instruction. How to Build an Instructional Coaching Program for Maximum Capacity Nina Jones Morel, Carla Staton Cushman, 2012-04-24. Chart your course for success! A guide for school and district leaders. Research supports the value of coaches in improving school culture and facilitating change that leads to staff and student success. This comprehensive resource guides school and district leaders through the journey of developing and sustaining an effective coaching program. The authors engage readers with a nautical metaphor that outlines the planning and implementation process, including how to cast a vision for the coaching program, determine desired characteristics of instructional coaches, use data to evaluate and refine the program, communicate the benefits to leaders, principals, and teachers, design appropriate professional training and support. **The Data Coach's Guide to Improving Learning for All Students** Nancy Love, Katherine E.
