Congress House,2009 *Horse-Powered Farming for the 21st Century* Stephen Leslie,2015 Now is a time of exciting new developments for live animal power As the numbers of adherents to this way of life grow ecologically minded farmers in their fields are developing efficient horse drawn systems and equipment manufacturers in small shops all across North America and Europe are coming forth with new innovations in ground drive technology that have us poised on the cusp of another agricultural revolution with working horses mules donkeys and oxen at the heart of it Publisher **A Stake in the Outcome** Jack Stack,Bo Burlingham,2003-09-16 The First Management Classic of the New Millennium A bold experiment is taking place these days as leading edge companies turn upside down the management paradigm that has dominated corporate thinking for more than one hundred years Southwest Airlines is perhaps the most visible practitioner soaring through economic downturns while its competitors slash their budgets and order massive layoffs but you can find other pioneers of the new approach in almost every industry and market niche Their secret a culture of ownership that allows them to tap into the most underutilized resource in business today namely the enthusiasm intelligence and creativity of working people everywhere No one knows more about building a culture of ownership than CEO Jack Stack who s been working on one for the past twenty years with his colleagues at SRC Holdings Corporation formerly Springfield ReManufacturing Corporation Along the way they ve turned their company into what Business Week has called a management Mecca attracting thousands of people representing hundreds of businesses to SRC s home in Springfield Missouri There the visitors learn how to incorporate the ideals and values of SRC s remarkable corporate culture into their own organizations and then they go back and do it Now in A Stake in the Outcome Stack offers a master class on creating a culture of ownership presenting the hard won lessons of his own twenty year journey and explaining what it really takes to build for long term success The pioneer of open book management described in the best selling classic The Great Game of Business Stack and twelve other managers began their journey in 1982 when they purchased their factory from its struggling parent company SRC grew 15 percent a year while adding almost a thousand new jobs and the company s stock price rocketed from 10 cents to 81 60 per share In the process Stack discovered that long term success required constant innovation and that building a culture of ownership involved much more than paying bonuses handing out stock options or setting up an employee stock ownership plan In a successful ownership culture every employee had to take the fate of the company as personally as an individual owner would Achieving that level of commitment was extraordinarily difficult but Stack realized that the payoff would be enormous a company that was consistently able to outperform the market A Stake in the Outcome isn t about

theory it's about practice Stack draws from his own successes and failures at SRC to show how any company can teach its employees to think and act like owners including how to implement an effective equity sharing program how to promote continuous learning at every level of the organization how to fire up employees competitive juices how to broaden the concept of leadership and delegate responsibility for the business and how to build a workforce that is fast on its feet and ready to take advantage of every opportunity You'll also learn about other companies that have succeeded in building cultures of ownership and the lessons they can teach the rest of us Written in Jack Stack's straightforward witty no beating around the bush style A Stake in the Outcome is like having a one on one session with a master entrepreneur and business innovator It shows managers and executives of companies both large and small how to build a ferociously motivated workforce that is energized and committed to meeting and overcoming the most daunting challenges a company can face
