based science When do we want it After peer review We have come to think of peer review as the stamp of quality that separates real results from mere conjecture but a look under the hood reveals that the participants inside of peer review are far from objective This book reclaims subjectivity and affirms a social mode of objectivity which prevents peer review from overpromising and underdelivering in its vital role in knowledge production **Thesis Writing for Master's and Ph.D. Program** Subhash Chandra Parija,Vikram Kate,2018-11-03 This book on Thesis Writing for Master s and Ph D program focuses on the difficulties students encounter with regard to choosing a guide selecting an appropriate research title considering the available resources conducting research and ways to overcome the hardships they face while researching writing and preparing their dissertation for submission Thesis writing is an essential skill that medical and other postgraduates are expected to learn during their academic career as a mandatory partial requirement in order to receive the Master s degree However at the majority of medical schools writing a thesis is largely based on self learning which adds to the burden on students due to the tremendous amount of time spent learning the writing skills in addition to their exhausting clinical and academic work Due to the difficulties faced during the early grooming years and lack of adequate guidance acquiring writing skills continues to be a daunting task for most students This book addresses these difficulties and deficiencies and provides comprehensive guidance from selecting the research title to publishing in a scientific journal

**Bibliometrics and Research Evaluation** Yves Gingras,2016-10-07 Why bibliometrics is useful for understanding the

global dynamics of science but generate perverse effects when applied inappropriately in research evaluation and university rankings The research evaluation market is booming Ranking metrics h index and impact factors are reigning buzzwords Government and research administrators want to evaluate everything teachers professors training programs universities using quantitative indicators Among the tools used to measure research excellence bibliometrics aggregate data on publications and citations has become dominant Bibliometrics is hailed as an objective measure of research quality a quantitative measure more useful than subjective and intuitive evaluation methods such as peer review that have been used since scientific papers were first published in the seventeenth century In this book Yves Gingras offers a spirited argument against an unquestioning reliance on bibliometrics as an indicator of research quality Gingras shows that bibliometric rankings have no real scientific validity rarely measuring what they pretend to Although the study of publication and citation patterns at the proper scales can yield insights on the global dynamics of science over time ill defined quantitative indicators often generate perverse and unintended effects on the direction of research Moreover abuse of bibliometrics occurs when data is manipulated to boost rankings Gingras looks at the politics of evaluation and argues that using numbers can be a way to control scientists and diminish their autonomy in the evaluation process Proposing precise criteria for establishing the validity of indicators at a given scale of analysis Gingras questions why universities are so eager to let invalid indicators influence their research strategy

*Experimental Physics* Walter F. Smith, 2020-03-18 This textbook provides the knowledge and skills needed for thorough understanding of the most important methods and ways of thinking in experimental physics The reader learns to design assemble and debug apparatus to use it to take meaningful data and to think carefully about the story told by the data Key Features Efficiently helps students grow into independent experimentalists through a combination of structured yet thought provoking and challenging exercises student designed experiments and guided but open ended exploration Provides solid coverage of fundamental background information explained clearly for undergraduates such as ground loops optical alignment techniques scientific communication and data acquisition using LabVIEW Python or Arduino Features carefully designed lab experiences to teach fundamentals including analog electronics and low noise measurements digital electronics microcontrollers FPGAs computer interfacing optics vacuum techniques and particle detection methods Offers a broad range of advanced experiments for each major area of physics from condensed matter to particle physics Also provides clear guidance for student development of projects not included here Provides a detailed Instructor's Manual for every lab so that the instructor can confidently teach labs outside their own research area

*Numerical Correlation between Impact Factor and Web Ranking of Electronic Scientific Journals Using Regression Analysis* Giorgos Kouropoulos, Γιώργος Κουρόπουλος, 2017-12-15 The present study attempts to examine the numerical correlation between web ranking of electronic scientific journals and impact factor of these journals using the method of regression analysis Regression analysis allows the option of investigating and predicting the numerical relationship between website ranking of

scientific journals on the World Wide Web and the value of impact factor of the journals A sample of 57 publishers with 6 272 scientific journals and 50 standalone scientific journals was analyzed during research procedure In this study two different indicators about websites classification on World Wide Web were examined separately for 57 publishers and 50 standalone journals Alexa rank and Statscrop rank The electronic databases through the internet constitute the main information resources of this study about the impact factors The general conclusion that arises is that the impact factor of electronic scientific journals illustrates a very strong positive correlation with classification of websites on the World Wide Web Furthermore it is concluded that the change of web ranking as a function of impact factor is governed by a Gaussian function or rational function with lower Pearson coefficient and presents non linearly correlation Even if there is very strong correlation between impact factor and web rank for electronic journals the prediction of impact factor from web rank is not possible and presents many divergences
