A Guide to Detracking Math Courses Angela Torres, Ho Nguyen, Elizabeth Hull Barnes, Laura Wentworth, 2023-05-03 Create a pathway to equity by detracking mathematics The tracked mathematics system has been operating in US schools for decades However research demonstrates negative effects on subgroups of students by keeping them in a single math track thereby denying them access to rigorous coursework needed for college and career readiness The journey to change this involves confronting some long standing beliefs and structures in education When supported with the right structures instructional shifts coalition building and educator training and support the detracking of mathematics courses can be a primary pathway to equity The ultimate goal is to increase more students access to and achievement in higher levels of mathematics learning especially for students who are historically marginalized Based on the stories and lessons learned from the San Francisco Unified School District educators who have talked the talk and walked the walk this book provides a model for all those involved in taking on detracking efforts from policymakers and school administrators to math coaches and teachers By sharing stories of real world examples lessons learned and prompts to provoke discussion about your own context the book walks you through Designing and gaining support for a policy of detracked math courses Implementing the policy through practical shifts in scheduling curriculum professional development and coaching Supporting and improving the policy through continuous research monitoring and maintenance This book offers the big ideas that help you in your own unique journey to advance equity in your school or district's mathematics education and also provides practical information to help students in a detracked system thrive

The Observation Protocol for Academic Literacies Magaly Lavadenz, Elvira G. Armas, 2024-01-16 This book presents a validated observation instrument to support and further develop the pedagogic expertise of teachers of English Learners in US schools Based on sociocultural and second language teaching and learning theories the Observation Protocol for Academic Literacies OPAL has a variety of uses across teacher preparation programs pre K 12 classroom contexts and school districts This book leads the reader through the

process of using OPAL with real classroom observations in the form of vignettes in order to develop confidence and reliability scoring evidence in research based practices The book provides examples of its non evaluative uses to conduct research support teachers and identify areas of strength and weakness in their professional development It also offers researchers and policymakers a tool for collecting classroom based evidence to inform the implementation and refinement of English Learner programs

The Education Invasion Joy Pullmann, 2017-03-14 Most Americans had no idea what Common Core was in 2013 according to polls But it had been creeping into schools nationwide over the previous three years and children were feeling its effects They cried over math homework so mystifying their parents could not help them even in elementary school They read motley assortments of informational text instead of classic literature They dreaded the high stakes tests in unfamiliar formats that were increasingly controlling their classrooms How did this latest and most sweeping reform of American education come in mostly under the radar Joy Pullmann started tugging on a thread of reports from worried parents and frustrated teachers and it led to a big tangle of history and politics intrigue and arrogance She unwound it to discover how a cabal of private foundation honchos and unelected public officials cooked up a set of rules for what American children must learn in core K 12 classes and how the Obama administration pressured states to adopt them Thus a federalized education scheme took root despite legal prohibitions against federal involvement in curriculum Common Core and its testing regime were touted as an absolute game changer in public education yet the evidence so far suggests that kids are actually learning less under it Why then was such a costly and disruptive agenda imposed on the nation s schools Who benefits And how can citizens regain local self governance in education so their children s minds will be fed a more nourishing intellectual diet and be protected from the experiments of emboldened bureaucrats The Education Invasion offers answers and remedies

Text-Dependent Questions, Grades K-5 Douglas Fisher, Nancy Frey, Heather Anderson, Marisol Thayre, 2014-09-02 Fisher Frey s answer to close and critical reading Learn the best ways to use text dependent questions as scaffolds during close reading and the big understandings they yield But that s just for starters Fisher and Frey also include illustrative video texts and questions cross curricular examples and an online facilitator s guide making the two volumes of TDQ a potent professional development tool across all of K 12 The genius of TDQ is the way Fisher and Frey break down the process into four cognitive pathways What does the text say How does the text work What does the text mean What does the text inspire you to do

Common Core CPR ReLeah Cossett Lent, Barry Gilmore, 2013-09-19 The ideal Newly minted high school graduates all across the nation each one a complex text genius a writer and analytic thinker beyond compare All on to glorious colleges and careers thanks to the Common Core The reality The 1 3 million students who fail to graduate from high school each year and the hundreds of thousands more who either gave up or lost interest long ago The reality is why Common Core CPR is needed Urgently Because if we continue to insist that all students meet expectations that are well beyond their abilities and mindsets these kids will only decline faster We must be brave enough and trained enough to cast

aside what we know harms students and apply with renewed vigor the teaching methods we know work. Releah Lent and Barry Gilmore rise to the challenge and there are no two authors better equipped to do so. They embrace what is best about the standards, their emphasis on active authentic learning, and then explicitly show teachers how to connect these ideal outcomes to practical classroom strategies detailing the day to day teaching that can coax reluctant learners into engagement and achievement. You'll learn how to:

- Consider choice and relevance in every assignment.
- Plan and spot opportunities for success.
- Scaffold students' comprehension of complex fiction and nonfiction texts.
- Model close reading through thoughtful questioning.
- Teach students to use evidence in reading, writing, speaking, and reflection.
- And so much more.

It's not the big sweeping formulas for achievement that will win the day; it's the incremental growth that teachers need to make happen. That one book, that one writing assignment to help a student turn a corner. If we can get that one transformational moment to occur and follow it up by designing more opportunities for success, that's the ideal, say Lent and Gilmore.
