Jsc Math Question 2013:

SCHOLAR -- a Scientific Celebration Highlighting Open Lines of Arithmetic Research A. C. Cojocaru, C. David, F.

Pappalardi, 2015-12-22 M Ram Murty has had a profound impact on the development of number theory throughout the world. To honor his mathematical legacy a conference focusing on new research directions in number theory inspired by his most significant achievements was held from October 15-17, 2013 at the Centre de Recherches Mathématiques in Montréal. This proceedings volume is representative of the broad spectrum of topics that were addressed at the conference such as elliptic curves, function fields, arithmetic Galois representations, modular forms and automorphic forms, sieve methods and transcendental number theory. This book is co-published with the Centre de Recherches Mathématiques. **Algebraic and**

Combinatorial Aspects of Tropical Geometry Erwan Brugalle, Maria Angelica Cueto, Alicia Dickenstein, Eva-Maria Feichtner, Ilia Itenberg, 2013-05-23 This volume contains the proceedings of the CIEM workshop on Tropical Geometry held December 12-16, 2011 at the International Centre for Mathematical Meetings CIEM Castro Urdiales, Spain. Tropical geometry is a new and rapidly developing field of mathematics. **Women Spacefarers** Umberto Cavallaro, 2017-03-02 This book tells the

fascinating stories of the valiant women who broke down barriers to join the space program. Beginning with the orbital flight of USSR cosmonaut Valentina Tereshkova in 1963, they became players in the greatest adventure of our time. The author contextualizes their accomplishments in light of the political and cultural climate from the Cold War in the background to the changing status of women in society at large during the Seventies. The book includes the biographies of and, in some cases, interviews with the sixty women who flew in space in the first half century of space history. It reports their achievements and some little-known details. The result is a gallery of pioneering women who reached for the stars: women who with exceptional skill, hard work and dedication reached impressive careers as accomplished pilots, researchers and engineers; many are now in high-level managerial positions both at NASA or in public and private organizations and all left a legacy of strength.

Algebraic Curves and Their Applications Lubjana Beshaj, Tony Shaska, 2019-02-26 This volume contains a collection of papers on algebraic curves and their applications. While algebraic curves traditionally have provided a path toward modern algebraic geometry, they also provide many applications in number theory, computer security and cryptography, coding theory, differential equations and more. Papers cover topics such as the rational torsion points of elliptic curves, arithmetic statistics in the moduli space of curves, combinatorial descriptions of semistable hyperelliptic curves over local fields, heights on weighted projective spaces, automorphism groups of curves, hyperelliptic curves, dessins d'enfants, applications to Painlevé equations, descent on real algebraic varieties, quadratic residue codes based on hyperelliptic curves and Abelian varieties and cryptography. This book will be a valuable resource for people interested in algebraic curves and their connections to other branches of mathematics. **Ordered Algebraic Structures and Related Topics** Fabrizio Broglia, 2017 Contains the
