 Larisa Lvova,Dmitry Kirsanov,2019-01-22 Nowadays the application of multisensor systems for the analysis of liquids and
 gases is becoming more and more popular in analytical chemistry Such systems also known as electronic tongues and
 electronic noses are based on various types of chemical sensors and biosensors with different transduction principles
 combined with multivariate data processing protocols These instruments received significant interest due to their simplicity
 low costs and the possibility to obtain reliable chemical information from complex unresolved analytical signals A distinct
 feature of electronic tongues and noses is that they can be calibrated for prediction of complex integral features in samples
 like e g taste odor toxicity geographical origin general conformity with certain standards etc the tasks that otherwise would
 require involvement of complex analytical instrumentation human or animal sensory panels In the present eBook the original
 research and review articles in the area of multisensor approach are collected They dedicated to the novel sensor materials
 development measuring techniques evaluation electronics data processing protocols and practical applications An editorial
 foreword article is followed by the researches authored by leading scientists in the field of chemical sensors and artificial
 sensing systems With this eBook we hope to inspire further interest and new research efforts in this exciting area **Let's**
