Pain is Not the Ultimate Enemy

- I Americans are probably the most pain-conscious people on the face of the earth. For years they have had it drummed into them through electronic and print media that any hint of pain is to be **banished** as though it were the ultimate evil. As a result, they are becoming a nation of pill-grabbers and hypochondriacs, escalating the slightest ache into a searing ordeal. Approximately 80 per cent of the world's pain pills are consumed in the United States, according to a 2011 congressional testimony from the American Society of Interventional Pain Physicians. 5
- II Since 1999, sales of prescription painkillers in the United States have quadrupled. According to a recent study by the US Centers for Disease Control and Prevention (CDC), in little over one decade (1999-2010), deaths from prescription painkiller overdose, whether accidental or intentional, leapt up to 400 per cent among women and 265 per cent among men. So have the number of fatal poisonings from prescription painkillers. CNN chief medical correspondent, Dr. Sanjay Gupta wrote in an editorial, "It is easier for a doctor to write a prescription than to explore other effective options to combat pain. Also, it is easier for patients to take prescription pills than to search for alternatives themselves. Both practices must absolutely change." 10 15
- III We know very little about pain and what we do not know makes it hurt all the more. Indeed, no form of illiteracy in the United States is as widespread or costly as ignorance about pain. Almost everyone can rattle off the names of at least a dozen drugs that can deaden pain from every conceivable cause, all the way from headaches to hemorrhoids. There is far less knowledge about the fact that about 90 per cent of pain is self-limiting, that it is not always an indication of poor health, and that, most frequently, it is the result of tension, idleness, suppressed rage, unhealthy lifestyle, or any of the other abuses encountered in modern society. 20 25
- IV Most doctors are **profoundly** troubled over the extent to which the medical profession today is taking on the trappings of a painkilling industry. Their offices are overloaded with people who are morbidly but mistakenly convinced that something dreadful is about to happen to them. It is all too evident that the campaign to get people to run to a doctor at the first sign of pain has boomeranged. Physicians find it difficult to give adequate attention to patients 30
