The International Conference on Quark Nuclear Physics 2002 QNP2002 was held in the Forschungszentrum Jilich from June 9 to 14 2002. It was organized by the Institute of Nuclear Physics IKP at the Forschungszentrum Jilich together with the Universities of Bonn and Mainz. This meeting takes place every two years and was the successor to QNP2000 which was held in Adelaide. QNP2002 brought together about 200 scientists from 25 countries who met for their scientific work in the Forschungszentrum but spent their free time in the medieval city of Aachen, the former capital of Charles the Great. The particular feature of this conference is that it provides a comprehensive overview of

the attempts in understanding hadrons and nuclei including dense matter in terms of their fundamental constituents the quarks and the gluons One of the basic themes of the program was that fact that we do have an underlying theory of strongly interacting particles namely the QCD For that reason the experimental topics covered during the meeting ranged from precision measurements with hadronic and electromagnetic probes to ultra relativistic heavy ion reactions Correspondingly the theoretical topics spanned an equally wide range including perturbative and lattice QCD calculations as well as effective theories and QCD motivated quark models In the morning sessions invited reviews were given In the afternoon twelve topical parallel sessions directed by conveners summarized the newest research results *Fusion Energy Update* ,1982-04
