### **The Daily 5**

Gail Boushey, Joan Moser, 2006 Do you love teaching but feel exhausted from the energy you expend cajoling disciplining and directing students on a daily basis Are you questioning the value of busy work but afraid that ceasing from such activities will lead to chaos in the classroom Have you heard the phrase work smarter not harder but don't have a clue how to start If so you'll want to meet The Sisters Gail Boushey and Joan Moser They set about designing a structure that would ensure all children were working at their level of challenge while taking responsibility for their learning and behaviour and that would provide meaningful instruction blocks without extensive preparation time for teachers Thus the Daily Five was born Based on literacy learning and motivation research the Daily Five has been practiced and refined in their own classrooms for 10 years and shared with thousands of teachers throughout the United States The Daily Five is a series of literacy tasks reading to self reading with someone writing word work and listening to reading which students complete daily while the teacher meets with small groups or confers with individuals

**Daily Five's Impact on Early Literacy Skills** Abigail Reba Masten, 2013 The purpose of this study was to see if the Daily 5 literacy block structure had any impact on literacy scores among kindergarten students specifically on letter naming letter sounds and sight words The author's current year kindergarten class of 16 students participated in the Daily 5 method Results were compared with the author's previous year's kindergarten class of 13 students who participated instead in a basal reading block framework from the Literacy By Design series The study took place in a small rural Minnesota elementary school The assessment data collected was administered by the

teacher using alphabet flashcards shown individually to each child Growth data was collected and compared over a quarter of the school years The author concluded that the Daily 5 group had a slightly higher level of mastery over letter naming letter sounds and sight words The author also noted that students succeeded at working independently with the Daily 5 method     **The Japan Daily Mail** ,1907     **The School Magazine** ,1928     Getting to the Common Core Sharon L. Spencer,Sandra Vavra,2015-01-01 The Common Core Standards have recently been adopted in most states across the nation and teachers are in the process of getting to the core of these standards Teaching to standards is not a new concept teachers have adapted to new standards every few years for quite some time And teachers are adaptable as can be seen in this book We are writing this book to demonstrate how teachers use research based strategies to meet Common Core Standards while still focusing on students Our goal is to help teachers visualize students in action as other teachers describe the implementation of research based strategies in their own classrooms show student work samples and provide reflections of student success in achieving the standards Many Common Core Standards books focus on the standards but our approach focuses on strategies that engage the students in the classroom showing how different teachers at varying grade levels have used the strategies to meet the standards With this focus we believe that teachers gain a new and positive perspective on approaching the new standards and see the flexibility of strategies for meeting standards across subject areas We have examined research on the strategies with the purpose of giving teachers a brief description of why these strategies work before giving actual examples from classrooms We also work closely with teachers in the public schools and have our finger on the pulse of what is happening in the public schools one of the current stressors being unpacking the Common Core Standards This book actually focuses on practice We begin by laying out a rationale in our first chapter The Core Values of Education Then each chapter focuses on a strategy including 1 a brief description about the research supporting each strategy and 2 several examples from different grade levels which include a description of how the strategy was used student work samples and a reflection on the use of the strategy The research descriptions are fairly short because while we believe professional educators aka teachers in this case should know the research that supports practice we know they are not typically interested in long diatribes about the research     **Special Report by the Bureau of Education** United States.
