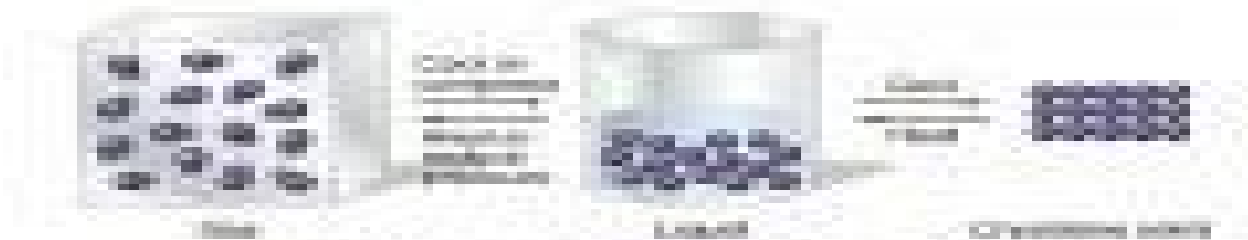

Figure 1: Representation of particles in different states of matter

Students should be able to explain the differences between the three states of matter and the changes of state.

### Key Concepts

1. Matter can be in three different states: solid, liquid, and gas. The particles in matter are always moving, and the state of matter can change. The change of state of matter is called a phase change. The change of state of matter is called a phase change. The change of state of matter is called a phase change.

Table 1: Representation of particles in different states of matter

	SOLID	LIQUID	GAS
How are the particles arranged?	The particles are arranged in a regular, packed arrangement. The particles are in contact with each other.	The particles are arranged in a disordered, close-packed arrangement. The particles are in contact with each other.	The particles are arranged in a disordered, widely spaced arrangement. The particles are not in contact with each other.
How are the particles moving?	The particles are vibrating in place. They are not moving from one position to another.	The particles are moving in a disordered, close-packed arrangement. They are in contact with each other.	The particles are moving in a disordered, widely spaced arrangement. They are not in contact with each other.
