The Report: Algeria 2015 Oxford Business Group,2015-12-12 Algeria is a country rich in history and situated in a strategically important region While its past has at times been turbulent the last decade has been one of relative peace Economic growth and development has followed driven primarily by advances in the hydrocarbons sector The fall in the international price of oil since mid 2014 however is having a substantial economic impact in particular on the country s trade balance and government finances On the positive side though the drop in prices is accelerating efforts to further diversify the economy pushing the government to open up the country to greater private and foreign investment in order to provide alternatives to state spending in part through measures to render the rigid investment environment more attractive
