MC145192 and MC145202 Evaluation Board Manual

INTRODUCTION

The MC145192EVK and MC145202EVK are two versions of one board with a few component changes. They allow users to exercise features of both devices and to build PLLs which meet individual performance requirements. The control program works with any board and can be used with other Motorola PLL devices (MC145190, MC145191, MC145200, MC145201, MC145220*). It will select frequency defaults that apply to each. All board functions are controlled through the printer port of an IBM PC. Up to three different EVKs may be controlled at the same time from one printer port. The functional block diagram is given in Figure 1.

This manual is divided into two sections. Section 1 describes the hardware and Section 2 covers the software control program.

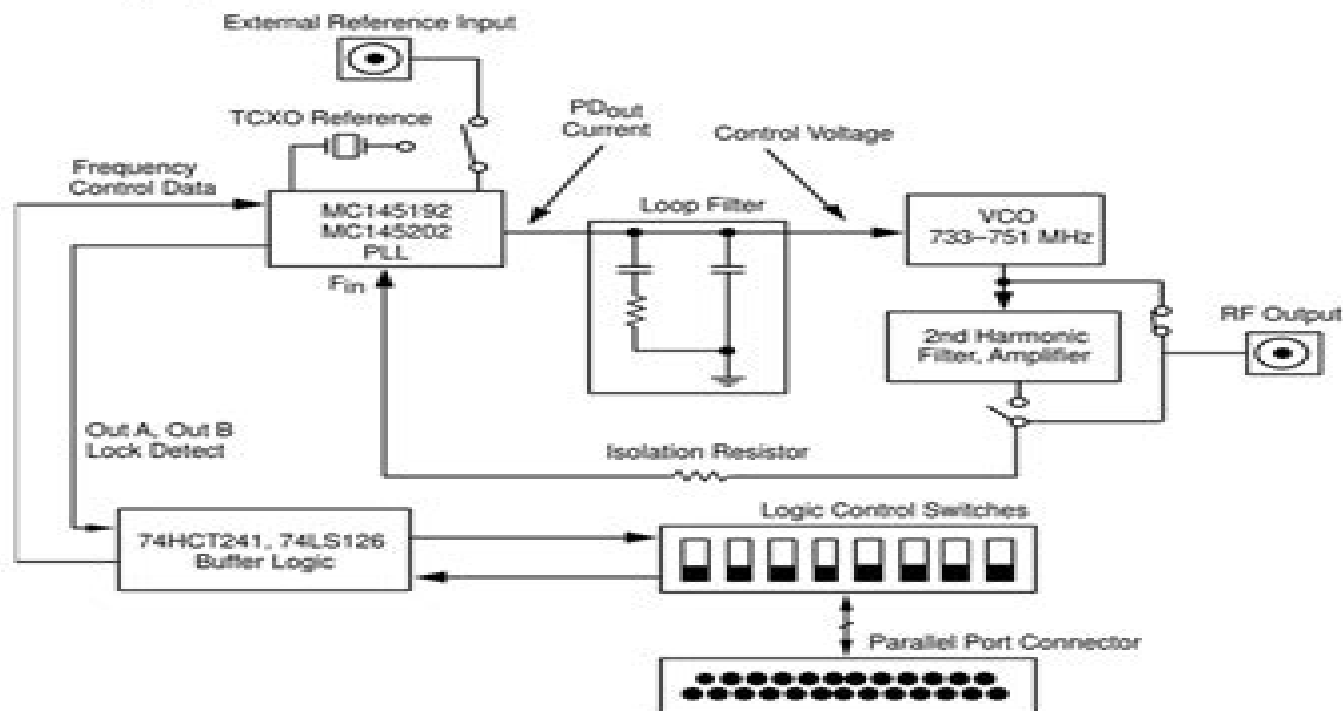

Figure 1. Evaluation Kit Block Diagram

* The MC145220 is not available with Rev. 2.5 software.
