Light Infantry of the Greek and Roman World Jean Charl du Plessis,2024-10-30 Ancient accounts of battle often neglected the role of lightly armed infantry presenting the deeds of the heavy infantry such as Greek hoplites or Roman legionaries or dashing cavalry charges as the decisive battle winners This bias was partly due to the light infantry typically being drawn from the poorer sections of society who could not afford to equip themselves with armor and because they generally fought from a distance killing from afar with missile weapons not bravely face to face like heroes worthy of recording Modern research has generally followed this bias Dr Jean Charl Du Plessis argues that while light infantry might have had a subordinate role in pitched battles such clashes were relatively rare occurrences Most ancient campaigns consisted mostly of foraging raiding and pillaging of enemy territory minor skirmishes and ambushes all roles in which light infantry excelled In particular they were indispensable for an army traversing mountainous or forested terrain Moreover he shows that even in pitched battles they were far from useless and made a valuable contribution typically harassing the enemy as they deployed and screening friendly battle lines from similar treatment Some such as Cretan archers or Balearic slingers were highly sought after specialists Uniquely the author draws on years of practical experimentation to demonstrate and test the various weapons used slings bows and javelins including the use of the amentum throwing strap This yields fresh evidence and insights into matters such as range penetrative power and the level of skill and practice required Overall this is a valuable study of these forgotten heroes of ancient warfare

Theater and Nation in Eighteenth-Century Germany Michael J. Sosulski, 2017-03-02 In 1767 more than a century before Germany was incorporated as a modern nation state the city of Hamburg chartered the first Deutsches Nationaltheater What can it have meant for a German playhouse to have been a national theater and what did that imply about the way these theaters operated Michael Sosulski contends that the idea of German nationhood not only existed prior to the Napoleonic Wars but was decisive in shaping cultural production in the last third of the eighteenth century operating not on the level of popular consciousness but instead within representational practices and institutions Grounding his study in a Foucauldian understanding of emergent technologies of the self Sosulski connects the increasing performance of body discipline by professional actors soldiers and schoolchildren to the growing interest in German national identity The idea of a German cultural nation gradually emerged as a conceptual force through the work of an influential series of literary intellectuals and advocates of a national theater including G E Lessing and Friedrich Schiller Sosulski combines fresh readings of canonical and lesser known dramas with analysis of eighteenth century theories of nationhood and evolving acting theories to show that the very lack of a strong national consciousness in

the late eighteenth century actually spurred the emergence of the German Nationaltheater which were conceived in the spirit of the Enlightenment as educational institutions Since for Germans nationality was a performed identity theater emerged as an ideal space in which to imagine that nation
