Smoke Alarm Advantages

Fire protection type alarms are generally more effective at detecting fire, warning you, and alerting your family more quickly and easily than any other type of alarm. Alarms of most types include flameless liquid or glass burning in a sealed container. The photoelectric type alarm are generally more effective at detecting fires, including fires which cannot be seen before burning into flames. Some of these fires may include cigarette burning in ashtrays or bedding. However, both types of alarm are designed to provide adequate detection of both types of fires. If you have the flameless optical system, you should install smoke alarm that contain at one alarm both photoelectric and ionization sensing technology.
