 Thomas S Y Ho PHD President Thomas Ho Company Ltd coauthor The Oxford Guide to Financial Modeling **The Sportswoman** Constance M. K. Applebee,1928 Electronic String Art Stephen Erfle,2024-02-20 String art is a well known and popular activity that uses string a board and nails to produce artistic images although there are variations that use different modalities This activity is beloved because simple counting rules are used to create beautiful images that can both adorn walls and excite young minds The downside of this highly tactile activity is that it is quite time consuming and rigid By contrast electronic string art offers much more flexibility to set up or change nail locations and counting rules and the images created from those changes change instantaneously Electronic String Art Rhythmic Mathematics invites readers to use the author s digital resources available on the ESA website to play with the parameters inherent in string art models while offering concise accessible explanations of the underlying mathematical principles regarding how the images were created and how they change Readers will have the opportunity to create visually beautiful works of art while learning concepts from geometry number theory and modular arithmetic from approximately 200 short interdependent sections Features Readers are able to drill down on images in order to understand why they work using short 1 to 2 page stand alone sections Sections are lessons that were created so that they could be digested in a single sitting These sections are stand alone in the sense that they need not be read sequentially but can be referred to based on images that the reader finds interesting An open ended inherently flexible teaching resource for elementary middle and high school level mathematics The most mathematically challenging sections or portions of a section are designated MA and may not be accessible to elementary and middle school readers Will be appreciated by anyone interested in recreational mathematics or mathematical artworks even if the users are not interested in the underlying mathematics Includes exercises solutions and many online digital resources These QR codes take you to these digital resources One takes you directly to the web version of the string art model used as a starting point for teaching the parameters of the model in Section 25 5 The other takes you to the ESA web page with additional links to a variety of resources **Information Retrieval Technology** Rafael Banchs,Fabrizio Silvestri,Tie-Yan Liu,Min Zhang,Sheng Gao,Jun Lang,2013-12-09 This book constitutes the refereed proceedings of the 9th Information Retrieval Societies Conference AIRS 2013 held in Singapore in December 2013 The 27 full papers and 18 poster presentations included in this volume were carefully reviewed and selected from 109 submissions They are organized in the following topical sections IR theory modeling and query processing clustering classification and detection natural language processing for IR social networks user centered studies and personalization and applications **Krishna's Jaunt and Other Stories** S M Sundaram,2016-10-14 The collection of stories in Krishna s Jaunt and Other Stories is a blend of fiction and fantasy While most of them deal with human emotions and human reactions to different sets of circumstances and situations quite a few deal with gods and goddesses who also despite their supernatural powers display human emotions and

reactions At times they too commit blunders that lead to hilarious situations Besides the gods and goddesses take to sports like cricket and soccer and a couple of stories are woven around them Animals like the dog and the squirrel too find a place in the stories where they play vital roles in apprehending criminals Amongst the stories are a few involving men of high principles and who are a role model for others With romance being the main theme in most of them and with humour interspersed here and there the stories make for an interesting read **A Company of Heroes** Marcus
