

**FISHERIES**  
**(FINAL)**

1. Which among the following species has the highest mean value of trophic level?
  - (A) *Sardinella longiceps*
  - (B) *Rastrelliger kanagata*
  - (C) *Epinephelus diacanthus*
  - (D) *Scomberoides tol*
  
2. Match-mismatch hypothesis, which implies that the timing of plankton production affects the year class strength, was formulated by
  - (A) Daniel Pauly
  - (B) Ray Hilborn
  - (C) Trevor Platt
  - (D) David Cushing
  
3. Which among the following fishes shows discontinuous distribution along the Indian coast?
  - (A) Mackerel
  - (B) Lesser sardines
  - (C) Bombay duck
  - (D) None of the above
  
4. Iliophagous fishes predominantly feed on
  - (A) Other fishes
  - (B) Plankton
  - (C) Algae
  - (D) Detritus
  
5. Traditional coastal wetlands of Goa are called
  - (A) Khazans
  - (B) Kettu
  - (C) Bheries
  - (D) Pumdies

## **Fishery Question Paper:**

*The Fishery Question* Charles Isham, 1887      **The Fisheries Exhibition Literature: Analytical index**, 1884      “The”  
**Fisheries Exhibition Literature**, 1884      **The Fisheries Exhibition Literature** London. International fisheries  
exhibition, 1883, 1884      **Parliamentary Papers** Great Britain. Parliament. House of Commons, 1905      **Fishery Science  
and Management** Warren S. Wooster, 2014-11-14 This volume is concerned with the role of science in fishery management  
While this has traditionally been considered as largely a biological problem with clear biological objectives close examination  
suggests that management decisions are largely controlled by political social and economic considerations biologically  
constrained The biologist now has the task of reducing the uncertainties of the venture rather than determining its priorities  
or its allocation of benefits The uncertainties arise in part because of lack of understanding of the ecological systems involved  
the limited availability of critical information and the unpredictability of driving forces The volume reviews the assumptions  
and simplifications of fishery models examines the decision making framework in fishery management and compares  
management practices in North America Japan and Northern Europe A compilation of fishery management objectives in  
international agreements and U S laws is included      **North Atlantic Coast Fisheries** Permanent Court of  
Arbitration, 1912      *Marine Fisheries Review*, 2005      North Atlantic Coast Fisheries, 1912      *Sessional Papers*, 1914  
Report of the Dominion fishery commission on the fisheries of the province of Ontario 1893 issued as vol 26 no 7 supplement  
North Atlantic Coast Fisheries Arbitration United States, 1909      **Use of Property Rights in Fisheries Management**  
Ross Shotton, 2000-01-01 The session was closed with papers that provided a prognosis on the future development of  
property rights in fisheries management Thus the conference papers addressed the theory and application of property  
**The Fisheries Exhibition Literature: Conferences**, 1884      **Fisheries Economics, Volume I** Lee G.  
Anderson, 2019-10-28 This title was first published in 2002 This important collection of international research on fisheries  
economics offers a comprehensive source of contemporary research on key topics in the field as well as presenting the  
history of how the economic theory of fisheries exploitation has developed Bringing into focus a wide range of inquiry this  
volume concentrates most particularly on the traditional economic problem of optimal resource allocation Individual papers  
examine fundamental issues including the lack of efficiency of open access and the specification of exactly what dynamic  
efficiency entails Fisheries Economics is an invaluable research reference collection for the libraries of academic and other  
professional economists as well as an indispensable resource for those studying across the fields of natural resources  
fisheries economics and particularly fisheries management      Fisheries Management Geoffrey Waugh, 2019-03-04 Among  
the problems of the modern fisheries industry is the persistent trend toward the severe depletion of fish stocks resulting in  
low catch rates and poor economic returns along with unnecessary accumulations of capital investments Dr Waugh argues  
that these problems call for effective management procedures based on bioeconomic modelling which integrates the

population dynamics of fish resources with the economic processes of harvesting and marketing Assessing developments in bioeconomic theory Dr Waugh discusses why recent advances have not been fully translated into improvements in the management of marine fisheries He cites the difficulties of reaching a consensus concerning suitable objectives for fisheries management as well as the problems of designing a regulatory framework to improve the operation of the industry To illustrate the utility of bioeconomic modelling Dr Waugh presents case studies of two Australian fisheries A dynamic stochastic numeric model is developed for the Exmouth Gulf Prawn Fishery to provide insights into the optimal exploitation of a yearly resource where fluctuations in recruitment natural mortality and catchability are important The study of the New South Wales Abalone Fishery highlights the difficulties of obtaining the necessary overview of a fishery and the problems in collecting the data required for modelling and management *A National Fisheries Society* Charles Edward Fryer, 1883

**Fish Or Cut Bait!** Fraser Institute (Vancouver, B.C.), 1997 From the back cover The authors of *Fish or Cut Bait* argue persuasively that fisheries are best managed under a system of strong property rights The book includes a discussion of whether individual transferable quotas can solve the salmon crisis a section detailing international experience with ITQ management a plan devised by fishers to implement individual quotas in the salmon fishery and a section suggesting that individual transferable quotas are only the first step in the evolution of stronger property rights to protect and conserve fisheries *"The" Fisheries Exhibition Literature* International Fisheries Exhibition, 1883 (London), 1884 *Fishery Bulletin*, 1972 *Proceedings: Organization and Sessional Business Papers and Discussions*, 1910

Fuel your quest for knowledge with is thought-provoking masterpiece, Dive into the World of **Fishery Question Paper** .
