to be split into several branches The present volume includes the following industries electrical engineering energy technology biomedicine maritime and rail transport automotive industry aviation The history of engineering societies of engineering education of intellectual property and of inventions as well as a synopsis of the personalities of Romanian engineering have been tackled in separate chapters For each field are engaged the collaboration of authors who have already published a history of their field Certain chapters were drafted with the aid of specialists who have played the part of policy makers in the elaboration of development strategies for Romania and who are familiar not only with the facts and the history of their field but also with the philosophy behind its development
