Ford Big-Block Parts Interchange George Reid, 2017-12-15 Over the course of performance car history and specifically muscle car history big block engines are particularly beloved and for good reason Not only are they the essence of what a muscle car is but before modern technology and stroker engines they were also the best way to make a lot of horsepower All of the Detroit manufacturers had their versions of big block engines and Ford was no exception Actually Ford was somewhat unique in that it had two very different big block engine designs during the muscle car era The FE engine was a design pioneered in the late 1950s primarily as a more powerful replacement for the dated Y block design because cars were becoming bigger and heavier and therefore necessitated more power to move What started as torquey engines meant to move heavyweight sedans morphed into screaming high performance mills that won Le Mans and drag racing championships through the 1960s By the late 1960s the design was dated so Ford replaced the FE design with the 385 series also known as the Lima design which was more similar to the canted valve Cleveland design being pioneered at the same time It didn't share the 1960s pedigree of racing success but the new design was better in almost every way it exists via Ford motorsports offerings to this day In **Ford Big Block Parts Interchange** Ford expert and historian George Reid covers both engines completely Interchange and availability for all engine components are covered including cranks rods pistons camshafts engine blocks intake and exhaust manifolds carburetors distributors and more Expanding from the previous edition of **High Performance Ford Parts Interchange** that covered both small and big block engines in one volume this book cuts out the small block information and devotes every page to the FE Series and 385 big blocks from Ford which allows for more complete and extensive coverage p p1 margin 0 0px 0 0px 0 0px font 12 0px Arial

1969 Ford Mustang Mach 1 Mike Mueller, 2018 By the time the 1969 model year rolled around it was well established that muscle cars were fast and plentiful Every manufacturer had at least one corner of the showroom where the go fast guys could congregate and discuss the merits and time slips of the latest performance offerings Competition being what it was the manufacturers were looking for ways to entice potential buyers to choose their product over ever increasing offerings from the competition Some manufacturers tried to accomplish this with affordable prices some tried fancy marketing schemes and some created a look and a style that screamed performance even when standing still The 1969 Mach 1 was Ford's attempt to create a package and a style to match the performance of its recently released and very potent 428 ci Cobra Jet engine package Displacing the still available but more conservative GT trim the Mach 1 included unique and innovative graphics and mechanical innovations including shaker hood scoops dual racing mirrors deluxe interiors competition suspension dual chrome exhaust tips and blacked out hoods The result was a wildly popular model that sold more than 70 000 units compared to slightly more than 5 000 GT models for the year Each volume in the **In Detail Series** provides an introduction and historical overview an explanation of the design and concepts

involved in creating the car a look at marketing and promotion an in depth study of all hardware and available options and an examination of where the car is on the market today Also included are paint and option codes VIN and build tag decoders as well as production numbers
