From Enslavement to COVID-19 Joe William Trotter Jr.,2025-08-21 During the COVID 19 pandemic commentators opined that the high concentration of African Americans in dangerous and unsafe work and living environments exposed them to the virus at higher and deadlier rates than their Euro American counterparts In *From Enslavement to COVID 19* Joe William Trotter Jr delves into the historical context of this phenomenon Focusing on four historical periods enslavement emancipation the industrial era and the digital age Trotter argues that rather than being anomalous the fight for adequate health care and beneficial social service policies follows a similar trajectory as the movement of Black people from enslavement to freedom Trotter emphasizes how the labor requirements of work shaped the African American encounter with disease how white medical professionals developed stereotypes about the susceptibility of Black people to sickness and how those professionals denied essential medical care to the country's most vulnerable *From Enslavement to COVID 19* also highlights how people of African descent drew on their legacy of activism and community building to improve their physical and mental conditions by creating programs and strategies to combat inequality and discrimination in the nation's health care system
