Discuss Their Schooling Experiences Gail L. Thompson, 2002-01-30 For decades researchers and policymakers have grappled with the issue of the underachievement of African American students. An age old problem has been that these students on average lag behind their peers of other racial ethnic groups in math science and reading. Recently California like some other states has implemented a high stakes standardized testing program that has revealed that when test scores are disaggregated along racial ethnic lines the scores of African American students continue to trail those of their peers. The study described in this book was undertaken in an effort to uncover schooling practices that are advantageous or detrimental to the achievement of African American students. The study was based on interviews and questionnaire results from nearly 300 African American high school seniors. Most of these students resided in a region that had a low college attendance rate and a high child poverty rate. The students were given an opportunity to discuss numerous issues pertaining to their schooling experiences including teacher attitudes and expectations, the curriculum, homework practices, the quality of services provided by their high school counselors, racism at school, school safety, parental involvement, and their early reading habits and attitudes about reading. In addition to quantitative results, most chapters include detailed narratives describing the elementary and secondary schooling experiences of the interviewees.

The Educated Child Chester E. Finn, Jr., John T. E. Cribb, Jr., William J. Bennett, 1999-12-24 If you care about the education of a child you need this book. Comprehensive and easy to use, it will inform, empower, and encourage you. Just as William J. Bennett's *The Book of Virtues* has helped millions of Americans teach young people about character, *The Educated Child* delivers what you need to take control. With coauthors Chester E. Finn Jr. and John T. E. Cribb Jr., former Secretary of Education, Bennett provides the indispensable guide championing a clear back to basics curriculum that will resonate with parents and teachers tired of fads and jargon. *The Educated Child* supplies an educational road map from earliest childhood to the threshold of high school. It gives parents hundreds of practical suggestions for helping each child succeed while showing what to look for in a good school and what to watch out for in a weak one. *The Educated Child* places you squarely at the center of your young one's academic career and takes a no nonsense view of your responsibilities. It empowers you as mothers and fathers, enabling you to reclaim what has been appropriated by experts and the education establishment. It outlines questions you will want to ask, then explains the answers or non answers you will be given. No longer will you feel powerless before the education system. The tools and advice in this guide put the power where it belongs in the hands of those who know and love their children best. Using excerpts from E. D. Hirsch's *Core Knowledge Sequence*, *The Educated Child* sets forth a state of the art curriculum from kindergarten through eighth grade that you can use to monitor what is and isn't being taught in your school. It outlines how you can help teachers ensure that your child masters the most important skills and knowledge. It takes on today's education controversies from phonics to school choice, from outcomes based education to teaching values, from the education of gifted children to the needs of the disabled. Because much of a youngster's education takes place outside the school, *The Educated Child* also

distills the essential information you need to prepare children for kindergarten and explains to the parents of older students how to deal with such challenges as television drugs and sex If you seek high standards and solid time tested content for the child you care so much about if you want the unvarnished truth about what parents and schools must do The Educated Child is the one book you need on your shelf
