Cartographic Science Donald Fenna, 2006-10-25 Geographic books routinely introduce map projections without providing mathematical explanations of projections and few delve into complex mathematical development or cover the breadth of projections From basic projecting to advanced transformations *Cartographic Science A Compendium of Map Projections with Derivations* is a comprehensive reference that offers an explanation of the science of cartography The book is a compilation of more than a hundred map projections from classic conics to contemporary transformations using complex variables Starting from widely described geometric projecting onto flat paper cylinder and cone and then progressing through several layers of mathematics to reach modern projections the author maximizes the application of one layer of complex mathematics before continuing on to the next He also supplies numerous one page tutorials that review terms and methodologies helping minimize the challenges of unfamiliar mathematical territory Divided into four parts the first section examines the shape and size of the Earth then proceeds to investigate the means for relating the curved surface to a flat surface and addresses scaling It goes on to cover pertinent principles of projection including literal projecting true but synthetic projections secantal projections pseudocylindrical projections and pseudoconical projections as well as the other variants of more serious projections The book concludes by looking at factors influencing Mean Sea Level and notes the cartographic aspects of current developments *Cartographic Science A Compendium of Map Projections with Derivations* explains the mathematical development for a large range of projections within a framework of the different cartographic methodologies This carefully paced book covers more projections with gentle and progressive immersion in the mathematics involved than any other book of its kind

Drafting for the Theatre Dennis Dorn, Mark Shanda, 2012-02-23 In this newly revised second edition veteran stage designers and technical directors Dennis Dorn and Mark Shanda introduce industry standard drafting and designing practices with step by step discussions illustrations worksheets and problems to help students develop and refine drafting and other related skills needed for entertainment set production work By incorporating the foundational principles of both hand and computer drafting approaches throughout the entire book the authors illustrate how to create clear and detailed drawings that advance the production process Early chapters focus on the basics of geometric constructions orthographic techniques soft line sketching applications lettering and dimensioning Later chapters

discuss real life applications of production drawing and ancillary skills such as time and material estimation and shop drawing nomenclature Two chapters detail a series of design and shop drawings required to mount a specific design project providing a guided path through both phases of the design construction process Most chapters conclude with one or more worksheets or problems that provide readers with an opportunity to test their understanding of the material presented The authors discussion of universal CAD principles throughout the manuscript provides a valuable foundation that can be used in any computer based design regardless of the software Dorn and Shanda treat the computer as another drawing tool like the pencil or T square but one that can help a knowledgeable drafter potentially increase personal productivity and accuracy when compared to traditional hand drafting techniques Drafting for the Theatre second edition assembles in one book all the principal types of drawings techniques and conventional wisdom necessary for the production of scenic drafting design and shop drawings It is richly illustrated with numerous production examples and is fully indexed to assist students and technicians in finding important information It is structured to support a college level course in drafting but will also serve as a handy reference for the working theatre professional
