Israel M Kirzner Entrepreneur Alert:

The Alert and Creative Entrepreneur Israel M. Kirzner, 2019 Israel M Kirzner is the 2006 winner of The International Award for Entrepreneurship and Small Business Research the FSF Nutek Award In this Prize Lecture he argues that a number of those who have commented on his work have misunderstood certain aspects of his theoretical system and as a result the common distinction in the literature between "Schumpeterian" and "Kirznerian" entrepreneurs is flawed He also argues that his understanding of the market process set in motion by entrepreneurial decisions provides a theoretical underpinning for public policy vis a vis entrepreneurship Professor Kirzner's main contributions to the economics of entrepreneurship were also presented and evaluated by Douhan Eliasson and Henrekson 2007 *Underdog*

Entrepreneurs Horatio M. Morgan, 2019-09-09 Entrepreneurship is challenging whatever your background in the current science and technology driven Western world However unlike traditionally dominant native born white male entrepreneurs in Silicon Valley and elsewhere those who face greater hurdles blocking their path to success primarily come from marginalized and minority groups both real and self perceived including immigrants refugees women blacks Hispanics and Asians Despite their potential to innovate and add value in the global marketplace they persistently struggle or fail because they lack the requisite code breaking skills This book helps these underdog entrepreneurs acquire those skills with actionable advice to achieve and sustain success It proposes a framework that pinpoints what the author calls the outsider problem that is situations in which individuals are primarily disadvantaged because they lack access to networks that facilitate superior learning and performance outcomes He completes the framework by incorporating personal qualities and strategies that can solve this problem Along the way Morgan distills insights and evidence from multiple fields combined with a fresh look at the familiar stories of initially marginalized business leaders such as Indra Nooyi Jack Ma Hilary Devey and Mike Lazaridis He also shares the less known but equally inspiring stories of others This book will help readers thrive while transcending their underdog status *The Encyclopedia of Libertarianism* Ronald Hamowy, 2008-08-15 As a continuation of the older tradition

of classical liberalism libertarian thinking draws on a rich body of thought and scholarship Contemporary libertarian scholars are continuing that tradition by making substantial contributions to such fields as philosophy jurisprudence economics evolutionary psychology political theory and history in both academia and politics With more than 300 A to Z signed entries written by top scholars *The Encyclopedia of Libertarianism* is purposed to be a useful compilation of and introduction to libertarian scholarship The Encyclopedia starts with an introductory essay offering an extensive historical and thematic overview of key thinkers events and publications in the development of libertarian thought The Reader's Guide groups content for researchers and students alike allowing them to study libertarianism topically biographically and by public policy issues Key Features Entries conclude with bibliographies and references for further reading and cross references to related entries Each entry provides an introduction to a topic or policy question relevant to libertarianism or a biography of a person

who has had an impact on libertarianism Editors take special care to ensure entries clearly explain libertarian approaches to issues do not take sides on disputed matters or engage in polemics and represent the views of all sides fairly and accurately

Transitions of Energy Regimes Holger Berg, 2013 Transitions of energy regimes are phenomena that have profoundly affected economies and civilisations over the last 600 years The shifts from wood to coal from coal to oil and the potential change to another resource that might be pending now have influenced the ways in which we work produce and live Though they are fundamentally influenced and steered by economic forces these changes have seen little analysis from the viewpoint of economic theory

This book seeks to contribute to filling this gap To this avail it firstly provides insight into the historical and present transitions that have taken place It then gives an overview of the existing economic approaches to energy regime transitions and develops a new interpretation based on evolutionary economics For this an approach based on complexity theory and complex adaptive systems is created and applied and the mechanisms behind regime changes are interpreted according to this framework The analysis is supported by further research into certain aspects of transitions Historical and present research on resource depletion is compared the working of path dependence in the constitution and decline of the oil regime is analysed and the role of entrepreneurship in a regime change from the oil regime towards a potential renewable energy regime is investigated The book closes with an appraisal of energy regime transitions as a future field of research for evolutionary economics

The Entrepreneurial Self Ulrich Bröckling, 2015-11-09 This is a book about who we are today and how we have become who we are It is about the engineers of the modern soul the entrepreneurial self It is essential reading for all those who care about the incessant demands placed on us to become more than we are to become entrepreneurs of our selves to maximise and optimise our capacities in ways that align personal identity and political responsibility Professor Peter Miller London School of Economics Political Science Ulrich Bröckling claims that the imperative to act like an entrepreneur has turned ubiquitous In Western society there is a drive to orient your thinking and behaviour on the objective of market success which dictates the private and professional spheres Life is now ruled by competition for power money fitness and youth The self is driven to constantly improve change and adapt to a society only capable of producing winners and losers The Entrepreneurial Self explores the series of juxtapositions within the self created by this call for entrepreneurship Whereas it can expose unknown potential it also leads to over challenging It may strengthen self confidence but it also exacerbates the feeling of powerlessness It may set free creativity but it also generates unbounded anger Competition is driven by the promise that only the capable will reap success but no amount of effort can remove the risk of failure The individual has no choice but to balance out the contradiction between the hope of rising and the fear of decline Ulrich Bröckling is Professor of Cultural Sociology at the Albert Ludwigs University Freiburg Germany
