Henslin, 2007-02-13 Presents a selection of forty six readings that provide an introduction to the sociological perspective look at how sociologists conduct research examine the cultural underpinnings of social life and discuss social groups and social structure gender and sexuality deviance and social stratification institutions and change Bodies of Knowledge Wendy Kline, 2010-10-15 Throughout the 1970s and 80s women argued that unless they gained access to information about their own bodies there would be no equality In *Bodies of Knowledge* Wendy Kline considers the ways in which ordinary women worked to position the female body at the center of women s liberation As Kline shows the struggle to attain this knowledge unified women but also divided them according to race class sexuality or level of professionalization

Each of the five chapters of *Bodies of Knowledge* examines a distinct moment or setting of the women's movement in order to give life to the ideas, expectations and pitfalls encountered by the advocates of women's health: the making of *Our Bodies, Ourselves* (1973); the conflicts surrounding the training and practice of women's pelvic exams; the emergence of abortion as a feminist issue; the battles over contraceptive regulation at the 1983 Depo-Provera FDA hearings; and the rise of the profession of midwifery. Including an epilogue that considers the experiences of the daughters of 1970s feminists, *Bodies of Knowledge* is an important contribution to the study of the bodies that marked the lives of feminism's second wave. Contemporary

Introduction to Sociology Jeffrey C. Alexander, Kenneth Thompson, Laura Desfor Edles, 2016-01-08 The first edition of *A Contemporary Introduction to Sociology* was the first truly new introductory sociology textbook in decades. Written by two leading sociologists at the cutting edge of theory and research, the text reflected the idioms and interests of contemporary American life and global social issues. The second edition continues to invite students to reflect upon their lives within the context of the combustible leap from modern to postmodern life. The authors show how culture is central to understanding many world problems as they challenge readers to confront the risks and potentialities of a postmodern era in which the futures of both the physical and social environment seem uncertain. As culture rapidly changes in the 21st century, the authors have broadened their analysis to cover developments in social media and new data on gender and transgender issues.

Bulletin of Suicidology National Clearinghouse for Mental Health Information (U.S.), 1967 *When the State Winks* Michal Kravel-Tovi, 2017-09-05 Religious conversion is often associated with ideals of religious sincerity. But in a society in which religious belonging is entangled with ethnonational citizenship and confers political privilege, a convert might well have multilayered motives. Over the last two decades, mass non-Jewish immigration to Israel, especially from the former Soviet Union, has sparked heated debates over the Jewish state's conversion policy and intensified suspicion of converts' sincerity. *When the State Winks* carefully traces the performance of state-endorsed Orthodox conversion to highlight the collaborative labor that goes into the making of the Israeli state and its Jewish citizens. In a rich ethnographic narrative based on fieldwork in conversion schools, rabbinic courts, and ritual bathhouses, Michal Kravel-Tovi follows conversion candidates, mostly secular young women from a former Soviet background, and state conversion agents, mostly religious Zionists, caught between the contradictory demands of their nationalist and religious commitments. She complicates the popular perception that conversion is a wink-wink relationship in which both sides agree to treat the converts' pretenses of observance as real. Instead, she demonstrates how their interdependent performances blur any clear boundary between sincere and empty conversions. Alongside detailed ethnography, *When the State Winks* develops new ways to think about the complex connection between religious conversion and the nation-state. Kravel-Tovi emphasizes how state power and morality is managed through winking: the subtle exchanges and performances that animate everyday institutional encounters between state and citizen. In a country marked by tension between official religiosity and a predominantly secular Jewish population, winking permits the

state to save its Jewish face *Bulletin of Suicidology* ,1969 The Publishers' Trade List Annual ,1985 *Forthcoming Books* Rose Arny,2000 Investigating the Stanford Prison Experiment Thibault Le Texier,2024-08-08 In 1971 psychologist Philip Zimbardo ran the now famous Stanford prison experiment to show that prison could make normal people behave in pathological ways Based on the first thorough investigation in the archives of the experiment and on interviews with about half of its participants this book shows that the Stanford prison experiment is far from being scientific In particular the guards knew what results were expected from them they were trained and supervised by the experimenters and they were following a schedule and a set of rules written by the experimenters The experimenters deceived the guards and made them believe they were not subjects They also borrowed many elements from a previous student experiment without disclosing this information in their reports The prisoners were not allowed to leave the experiment at will and they were conditioned by the experimenters The mock prison situation was unrealistic Most participants did not forget they were participating in an experiment and many responded to demand characteristics The data was not collected properly And the conclusions were pre written according to non academic aims This book goes beyond the experiment to provide ample background and context in order to understand how the experiment was planned financed recorded and divulged in the press and within the academic It discusses also the role played by Philip Zimbardo in the trial of one of the guards of Abu Ghraib as well as the impact of mass media on science the debates between personal psychology and social psychology and the specific nature of cold war social science
