Civil Society and Financial Regulation Lisa Kastner,2017-10-12 Coalitions of consumer groups NGOs and trade unions have traditionally been considered politically weak compared to well organized and resourceful financial sector groups which dominate or capture financial regulatory decisions However following the 2008 financial crisis civil society groups have been seen to exert much more influence with politicians successfully implementing

financial reform in spite of industry opposition Drawing on literature from social movement research and regulatory politics this book shows how diffuse interests were represented in financial regulatory overhauls in both the United States US and the European Union EU Four cases of reform in the post crisis regulatory context are analyzed the creation of a new Consumer Financial Protection Bureau in the US the introduction of new consumer protection regulations through EU directives the failure of attempts to introduce a financial transaction tax in the US and the agreement of 11 EU member states to introduce such a tax It shows how building coalitions with important elite allies outside and inside government helped traditionally weak interest groups transcend a lack of material resources to influence and shape regulatory policy By engaging with a less well known side of the debate it explains how business power was curbed and diverse interests translated into financial regulatory policy *Financing the Green Transformation* U. Volz, Judith Böhnke, Laura Knierim, Katharina Richert, Greta-Maria Roeber, Vanessa Eidt, 2015-06-09 Explores challenges for developing and emerging economies for enhancing green financing for sustainable low carbon investment looking at Indonesia Based on surveys in the Indonesian banking and corporate sectors and expert interviews it devises innovative policy recommendations to develop a framework conducive to fostering green investments **The Road to Serfdom** David Linden, Nick Broten, 2017-07-05 Friedrich Hayek's 1944 *Road to Serfdom* is a classic of conservative economic argument While undeniably a product of a specific time in global politics which saw the threat of fascism from Nazi Germany and its allies beguilingly answered by the promises of socialism Hayek's carefully constructed argument is a fine example of the importance of good reasoning in critical thinking Reasoning is the art of constructing good persuasive arguments by organizing one's thoughts supporting one's conclusions and considering counter arguments along the way The *Road to Serfdom* illustrates all these skills in action Hayek's argument was that while many assumed socialism to be the answer to totalitarian fascist regimes the opposite was true Socialist government's reliance on a large state centralised control and bureaucratic planning he insisted actually amounts to a different kind of totalitarianism Freedom of choice Hayek continued is a central requirement of individual freedom and hence a centrally planned economy inevitably constrains freedom Though many commentators have sought to counter Hayek's arguments his reasoning skills won over many of the politicians who have shaped the present day most notably Margaret Thatcher and Ronald Reagan Shattered Minds Robert H. Bauman, Dina Rasor, 2019-03-01 *Shattered Minds* is the first book to investigate how American military bureaucracies have let our troops down by failing to upgrade one of the most important pieces of personal safety equipment the combat helmet Two longtime employees of North Dakota defense contractor Sioux Manufacturing discovered that the required density of the Kevlar material woven into the netting of combat helmets was being shorted After bringing their discovery to the attention of management their boss rather than cleaning up the illegal practice accused them of having an adulterous affair Both employees were fired leading to a lawsuit and a court judgment in their favor that eventually brought the company's bad faith practices to light Around the same time a

separate whistleblower a retired Navy doctor was pulled into a bizarre struggle with Army and Marine bureaucracies when he discovered from his Marine grandson that the protective webbing inside the military helmets was inadequate Why was the military so resistant to upgrading the most essential piece of gear to protect soldiers from traumatic brain injury

Interweaving these two whistleblower stories Robert H Bauman and Dina Rasor explain why the military despite news coverage and congressional hearings on the faulty helmet continued to do the indefensible They also suggest how the public the press and military institutions can remedy the problem to give U S troops effective helmets when serving to protect their country
