## **Joas Special Edition 2013:**

**Transforming Warriors** Peter Haldén, Peter Jackson, 2016-05-12 This volume offers an interdisciplinary study of how different cultures have sought to transform individuals into warriors War changes people however a less explored question is how different societies want people to change as they are turned into warriors When societies go to war they recognize that a boundary is being crossed The participants are expected to do things that are otherwise prohibited or at least governed by different rules This edited volume analyses how different cultures have conceptualized the transformations of an individual passing from a peacetime to a wartime existence to become an active warrior Despite their differences all societies grapple with the same question how much of the individual's peace self should be and can be retained in the state of war The book explores cases such as the Nordic berserkers the Japanese samurai and European knights as well as modern soldiers in Germany Liberia and Sweden It shows that archaic and modern societies are more similar than we usually think both kinds of societies use myths symbols and rituals to create warriors Thus this volume seeks to redefine theories of modernization and secularization It shows that military organizations need to take myths symbols and rituals seriously in order to create effective units This book will be of much interest to students of military studies war studies sociology religion and international relations in general

virtues The Human Paradox shows how rediscovering the nature of the human can help not just to understand one's own paradoxical nature but to act in ways that are more consistent with its full reality Offering accessible insight from both traditional and contemporary thought The Human Paradox shows how a fuller richer vision of the human can help address urgent contemporary problems including the challenges of cultural and religious diversity human migration and human rights the role of the market artificial intelligence the future of democracy and global climate change This fresh perspective on the Western past will guide readers into what it means to be human and open new possibilities for the future

**Rethinking Democracy Promotion in International Relations** Jessica Schmidt, 2015-08-20 This book traces and conceptualises the changing notion of democracy and demonstrates how democracy promotion finds itself at the heart of contemporary international discourses and policies Democracy promotion is widely considered to constitute a hypocritical and failed grand international narrative of the 1990s and has allegedly been replaced by other more pressing and academically more captivating concerns such as conflict management statebuilding and climate change This book challenges this position and argues that the core notions of democracy promotion such as empowerment inclusion and responsiveness are a key concern of contemporary international policymakers Drawing on the work of Michel Foucault Hannah Arendt as well as John Dewey it investigates the notion of democracy and modality of its promotions through the policy fields of conflict management statebuilding and climate change The central development the book observes is the reconceptualisation of democracy from the constituted sphere of the public to the lived relations of the social The book argues that the novel rationality of democracy and its promotion offers a particular solution to governing impasses in a world perceived to be globalised and

complex which accounts for democracy's current but neglected centrality. This book will be of much interest to students of democracy, intervention, statebuilding, global governance and IR in general.

*Cosmoipolitan Justice* Jonathan Bowman, 2015-01-12. This book assesses the rapid transformation of the political agency of religious groups within transnational civil society under the conditions of globalization that have weakened the sovereign nation state. It offers a comprehensive synthesis of the parallel resurgences of Jasper's axial thesis from the distinct lines of research initiated by Eisenstadt, Habermas, Taylor, Bellah and others. It explores the concept of cosmoipolitanism from the combined perspectives of sociology of religion, critical theory, secularization theory and evolutionary cultural anthropology. At the theoretical level, cosmoipolitanism prescribes how local, national, transnational, global and virtual spaces ought publically to engage in transcivilizational discourse without presuming secular assumptions tied to cosmopolitanism. As a transnational extension of the moral/ethical universality of the great Axial Age traditions, cosmoipolitanism provides an ideal description of empirical data. Employing the insights of critical theory, this book offers a micro-level analysis of the pragmatics of discourse of each of the major axial traditions, producing a genealogy in iterated stages of the dialectics of secularization as a multi-faceted narrative of the role of religion in alternative modernities. While circumscribing the particular historical limits of each tradition, the book extends their internal claims to species universality in light of the potential for boundless communication Jasper saw as initiated with the Axial Age. In Jon Bowman's novel and important work, he rethinks the challenges of global justice. Bowman is not just concerned with global justice in the modern world but with a genealogy that begins with a better understanding of the Axial age, one that is also the unique signature of cosmoi-political institutions. Arguing with depth and precision, Bowman challenges Kantian and Rawlsian universalism. His argument provides a new interpretation of cosmopolitan justice as he explores the deeper roots of cosmopolitan justice. James Bohman, Saint Louis University. Jon Bowman's *Cosmoipolitan Justice* is an important, innovative and timely work. Construing globality in terms of pervasive conditions of worldwide interdependence, Bowman advances a

decidedly pluralistic account of cosmopolitanism one uniquely shaped by recent theories of multiple modernities His analysis is sustained by a highly informed appropriation of such diverse thinkers as Theodor Adorno Abudullah An Naim Talad Asad Schmuel Eisenstadt J rgen Habermas Karl Jaspers John Rawls Amartya Sen and Charles Taylor One special feature is the book s synthesis of research on global governance with that on post secularity and the place of religion in the public sphere On this basis Bowman presents a distinctive account of the world s axial religions one underwriting a multi polar intercultural global public realm able to address social political and economic issues confronting the global community today This book should be of great interest to students and scholars in philosophy political theory international relations sociology and religious studies Professor Andrew Buchwalter Department of Philosophy University of North Florida

Gschwandtner covers major themes in Marion's work the historical event art nature love gift and sacrifice prayer and the Eucharist She works within the phenomenology of givenness but suggests that Marion himself has not considered important aspects of his philosophy Christina M Gschwandtner has established herself as a valued reader of contemporary French philosophy in general and of Marion's writings in particular She was the first to consider at length Marion's extensive reflections on Descartes and to evaluate their theological importance and she has translated two of Marion's books from the French This new study *Degrees of Givenness* extends her contribution to our understanding of this fecund philosopher Notre Dame Philosophical Reviews

**The Secular State Under Siege** Christian Joppke,2015-04-22 Throughout human history religion and politics have entertained the most intimate of connections as systems of authority regulating individuals and society While the two have come apart through the process of secularization secularism is challenged today by the return of public

religion This cogent analysis unravels the nature of the connection disconnection and attempted reconnection between religion and politics in the West In a comparison of Western Europe and North America Christianity and Islam Joppke advances far reaching theoretical historical and comparative political arguments With respect to theory it is argued that only a substantive concept of religion as pertaining to the existence of supra human powers opens up the possibility of a historical comparative perspective on religion At the level of history secularization is shown to be the distinct outcome of Latin Christianity itself And at the level of comparative politics the Christian Right in America which has attacked the wall of separation between religion and state and Islam in Europe with the controversial insistence on sharia law and other illiberal claims from some quarters are taken to be counterpart incarnations of public religion and challenges to the secular state This clearly argued sweeping book will provide an invaluable framework for approaching an array of critical issues at the intersection of religion law and politics for advanced students and researchers across the social sciences and legal studies as well as for the interested public

The Art and Science of Sociology Roland Robertson, John Simpson, 2016-07-06 The book consists of a volume of essays in honor of the outstanding sociologist Edward A Tiryakian whose work has spanned a considerable number of countries regions and topics He has been highly influential particularly in American and French sociology

**The Emergence of Institutions** Elke Weik, 2022-08-27 This book presents an experiential aesthetic affective approach to the study of institutions Drawing on institutional sociology hermeneutics phenomenology and process philosophy it conceptualises institutions as collective experiences with their own self promoting and self propelling powers Instead of seeing institutional emergence change and decline as the result of actors interests and manipulations this book re establishes the importance of factors beyond human design and intervention Drawing on process theory it shows how ideas norms and values can form self stabilising configurations that affect people without conscious realisation It complements current thinking about institutions by showing how institutions constitute people long before people constitute them With the help of authors as diverse as Antonio Damasio A N Whitehead J W von Goethe and Max Weber Elke Weik crafts a perspective that allows us to understand institutions as aesthetic and affective powers in their own right This book is for researchers interested in process theory institutional and organisational studies hermeneutics and aesthetics
