argues that rural broadband policy is both broken and incomplete broken because it lacks coordinated federal leadership and incomplete because it fails to recognize the important roles of communities cooperatives and local providers in broadband access For example existing policies favor large telecommunication companies crowding out smaller nimbler providers Lack of competition drives prices up rural broadband can cost 37 percent more than urban broadband The federal government subsidizes rural broadband by approximately 6 billion Where does the money go Ali proposes democratizing policy architecture for rural broadband modeling it after the wiring of rural America for electricity and telephony Subsidies should be equalized not just going to big companies The result would be a multistakeholder system guided by thoughtful public policy and funded by public and private support
