Constitutional Adjudication in Africa Charles M Fombad,2017-09-01 Since the 1990 wave of constitutional reforms in Africa the role of constitutional courts or courts exercising the power to interpret and apply constitutions have become a critical aspect to the on going process of constitutional construction reconstruction and maintenance These developments appear at least from the texts of the revised or new constitutions to have resulted in fundamental changes in the nature and role of courts exercising jurisdiction in constitutional matters The chapters in this second volume of the Stellenbosch Handbooks in African Constitutional Law series are the first to undertake a critical and comparative examination of the interplay of the diverse forms of constitutional review models on the continent Comparative analysis is particularly important given the fact that over the last two decades constitutional courts in Africa have been asked to decide a litany of hotly contested and often sensitive disputes of a social political and economic nature As the list of areas in which these courts have intervened has grown so too have their powers actual or potential By identifying and examining the different models of constitutional review adopted these chapters consider the extent to which these courts are contributing to enhancing constitutionalism and respect for the rule of law on the continent The chapters show how the long standing negative image of African courts is slowly changing The courts have in responded in different ways to the variety of constraints incentives and opportunities that have been provided by the constitutional reforms of the last two decades to act as the bulwark against authoritarianism and this provides a rich field for analysis filling an important gap in the literature of contemporary comparative constitutional adjudication This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read on the Oxford Academic platform and offered as a free PDF download from OUP and selected open access locations

**The Constitutional Balance** John Laws,2021-01-28 In The Constitutional Balance Sir John Laws has left a vivid and timely commentary on one of the most pressing issues in the legal world today The debate continues whether or not judges venture too far into issues of Government policy and whether or not there are any limits on the power of the executive and the legislature to propose and enact legislation that unduly restricts fundamental freedoms in a democratic society subject to the rule of law Sir John Laws examines the relationship between constitutional fundamentals and values He finds basic ideals of reason fairness and the presumption of liberty in the common law and recognises that a democratically accountable executive and legislature must be able to make policy and enact and implement

legislation to pursue social goals The courts then interpret the laws As Sir John puts it The meeting of Parliament and the common law in the crucible of statutory interpretation is close to the core of the constitutional balance These fundamental values can compete with each other giving rise to tensions within and between key state institutions in particular the executive and the judiciary A constitutional balance between them must be found if the constitution is to function properly each institution is to understand the proper extent and limits of its authority and the rule of law is to be maintained Sir John draws on his life long experience as a barrister judge and academic and on case law and learning to explain in vibrant and engaging terms how such a constitutional balance might be achieved

Graham Bull, Damien Kempf, 2014 *The First Crusade 1095-1101* was the stimulus for a substantial boom in Western historical writing in the first decades of the twelfth century beginning with the so called eyewitness accounts of the crusade and extending to numerous second hand treatments in prose and verse. From the time when many of these accounts were first assembled in printed form by Jacques Bongars in the early seventeenth century and even more so since their collective appearance in the great nineteenth century compendium of crusade texts the *Recueil des historiens des croisades* narrative histories have come to be regarded as the single most important resource for the academic study of the early crusade movement. But our understanding of these texts is still far from satisfactory. This ground breaking volume draws together the work of an international team of scholars. It tackles the disjuncture between the study of the crusades and the study of medieval history writing setting the agenda for future research into historical narratives about or inspired by crusading. The basic premise that informs all the papers is that narrative accounts of crusades and analogous texts should not be primarily understood as repositories of data that contribute to a reconstruction of events but as cultural artefacts that can be interrogated from a wide range of theoretical, methodological and thematic perspectives. **MARCUS BULL** is Andrew W. Contributors address current knowledge of genetic influence on athletic performance, individual responses to exercise training as well as the genetics of musculoskeletal phenotypes, exercise related injuries, flexibility and neurodegenerative disorders in athletes. Finally, performance related and psychological traits associated with epigenetic, transcriptomic and metagenomic biomarkers are also considered along with nutritional and pharmacogenomic aids in sports medicine and personalized nutrition.
