HTTP 417 Guru Bruno,2021-06-01 The HTTP 417 Expectation Failed is one of the status codes on the internet and it indicates that the expectation given in the request's Expect header field Section 5.1.1 could not be met. In the case of a start-up, the company expects someone to pay them. This payment can be in form of outright purchase or monthly or annual subscription or both. The Customer also has an expectation. The expectation would be of a product or a service that is available, accessible, and affordable and at or above a certain quality. When one or both of these expectations cannot be met, the start-up fails. This book discussing the causes of failures and methods to avoid common errors causing failures is an attempt to share what I have learned in the past three decades in both Healthcare and Information Technology. This book does not quote any scientific papers or data regarding Information Technology and Start-Ups and may be taken as a non-peer-reviewed, subjective, highly opinionated work of a single individual based on his experience. You are free to disagree with this part of the book. The Psychological Phenomena namely 1. Kbler-Ross Grief Cycle 2. Dunning-Kruger Effect 3. Ikea Effect 4. Maslow's Hierarchy of Needs are from standard textbooks, peer-reviewed journals. The Crux of this little book is my Original Research in which I apply the above-mentioned psychological phenomena to the Start-up ecosystem and suggest solutions for improving the product and profit.
