Index of Technical Publications United States. Department of the Army, 1977 *The Future of University Education* Michał Izak, Monika Kostera, Michał Zawadzki, 2017-04-26 This collected volume of essays offers glimpses of the future of university education While universities consider the spirit of theoretical exchange and intellectual pursuit to be a defining trait of their identity this book argues that this heritage is disappearing under the influence of the short term demands of societies and markets Universities used to be sites of dissent civil courage and societal conscience but have now instead become little more than pseudo businesses rendering them incapable of remaining critical or independent However with more people going to university every year there is a strong resistance to the notion that the university as a collegial and critical institution is dead among academics as well as the broader public With contributions from scholars across the world this edited collection explores the ramifications of marketization on universities and provides glimpses of what higher education will look like in the future It will be of great interest to teachers and students in higher education as well as policy makers and those interested in the current and future state of higher education *Technical Reports Awareness Circular : TRAC.* , 1987 *Securing Water and Wastewater Systems* Robert M. Clark, Simon Hakim, 2013-10-04 Urban water and wastewater systems have an inherent vulnerability to both manmade and natural threats and disasters including droughts earthquakes and terrorist attacks It is well established that natural disasters including major storms such as hurricanes and flooding can effect water supply security and integrity Earthquakes and terrorist attacks have many characteristics in common because they are almost impossible to predict and can cause major devastation and confusion Terrorism is also a major threat to water security and recent attention has turned to the potential that these attacks have for disrupting urban water supplies There is a need to introduce the related concept of Integrated Water Resources Management which emphasizes linkages between land use change and hydrological systems between ecosystems and human health and between political and scientific aspects of water management An expanded water security agenda should include a conceptual focus on vulnerability risk and resilience an emphasis on threats shocks and tipping points and a related emphasis on adaptive management given limited predictability Internationally concerns about water have often taken a different focus and there is also a growing awareness including in the US that water security should include issues related to quantity climate change and biodiversity impacts in addition to terrorism This presents contributions from a group of internationally recognized experts that attempt to address the four areas listed above and includes suggestions as to how to deal with related problems It also addresses the new and potentially growing issue of cyber attacks against water and waste water infrastructure including descriptions of actual attacks making it of interest to scholars and policy makers concerned with protecting the
