Crappy Children's Art Maddox,2012-11-20 From the New York Times bestselling author of *The Alphabet of Manliness* the creator of *The Best Page in the Universe* and overall genius comes an outrageous laugh out loud critique of children s artwork that finally cuts those little smug know it alls down to size Previously published as *I Am Better Than Your Kids* If you think children are precious little snowflakes who are perfect in every way think again If you cherish every piece of art every book report every letter to Santa your child gives you then this book is not for you If your refrigerator is adorned with mementos from your kid s childhood then you are a sucker Maddox who has been writing hilarious essays for his popular site *TheBestPageInTheUniverse.com* since 1996 can spell do math and run faster than your kids and he is here to show you just how inferior your kids are Marvel as Maddox deconstructs an eight year old s crayon drawn family portrait Laugh uproariously as he judges sub par Valentines homemade gifts and other areas of elementary aged underperformance Why reward weakness and mediocrity with gold stars You are in Maddox s world now and no child is safe from the scrutiny and critical gaze of the world s foremost authority on children s crappy artwork

The Charisma Machine Morgan G. Ames,2019-11-19 A fascinating examination of technological utopianism and its complicated consequences In *The Charisma Machine* Morgan Ames chronicles the life and legacy of the One Laptop per Child project and explains why despite its failures the same utopian visions that inspired OLPC still motivate other projects trying to use technology to disrupt education and development Announced in 2005 by MIT Media Lab cofounder Nicholas Negroponte One Laptop per Child promised to transform the lives of children across the Global South with a small sturdy and cheap laptop computer powered by a hand crank In reality the project fell short in many ways starting with the hand crank which never materialized Yet the project remained charismatic to many who were captivated by its claims of access to educational

opportunities previously out of reach Behind its promises OLPC like many technology projects that make similarly grand claims had a fundamentally flawed vision of who the computer was made for and what role technology should play in learning Drawing on fifty years of history and a seven month study of a model OLPC project in Paraguay Ames reveals that the laptops were not only frustrating to use easy to break and hard to repair they were designed for technically precocious boys idealized younger versions of the developers themselves rather than the children who were actually using them The Charisma Machine offers a cautionary tale about the allure of technology hype and the problems that result when utopian dreams drive technology development

Equipping Space Cadets Emily Midkiff,2022-04-19 Winner of the 2023 Science Fiction Research Association SFRA Book Award 2022 Longlist Nominee for the Best Non Fiction Award from the British Science Fiction Association Equipping Space Cadets Primary Science Fiction for Young Children argues for the benefits and potential of primary science fiction or science fiction for children under twelve years old Science fiction for children is often disregarded due to common misconceptions of childhood When children are culturally portrayed as natural and simple they seem like a poor audience for the complex scientific questions brought up by the best science fiction The books and the children who read them tell another story Using three empirical studies and over 350 children s books including If I Had a Robot Dog Bugs in Space and Commander Toad in Space

Equipping Space Cadets presents interdisciplinary evidence that science fiction and children are compatible after all Primary science fiction literature includes many high quality books that cleverly utilize the features of children s literature formats in order to fit large science fiction questions into small packages In the best of these books authors make science fiction questions accessible and relevant to children of various reading levels and from diverse backgrounds and identities Equipping Space Cadets does not stop with literary analysis but also presents the voices of real children and practitioners The book features three studies a survey of teachers and librarians quantitative analysis of lending records from school libraries across the United States and coded read aloud sessions with elementary school students The results reveal how children are interested in and capable of reading science fiction but it is the adults including the most well intentioned librarians and teachers who hinder children s engagement with the genre due to their own preconceptions about the genre and children

Bonsai Kids Stephen Ling,2022-01-16 One evening at the campus in China I was waiting at the main gate to the campus for a student to have dinner with me It was a eureka moment for me because it was the first time I took notice of the two huge bonsai trees in elegant pots one on either side of the gate Suddenly I saw something more than those two elegant potted trees They reminded me of the young men and women under my care in my daily classes their thinking behaviors mindsets personal interactions class participation community activities likes and dislikes and habits were expected and predictable because of years of trimming pruning twisting and shaping by their parents to be who they are today They are the bonsai kids Here are some of their voices Meanwhile I got a five thousand Australian dollar scholarship from the university that I applied to I then managed to persuade my parents to support me I was lucky because my parents said yes to me because they did not want to let me down Now I am studying for a master s degree at the Blue Mountains International Hotel Management School in Australia In the words of Steve Do what you have to do to get where you want to be Jay Qi long Han I studied very hard because I wanted to become a doctor I wanted to help my mother because she is not a healthy person I was able to enter Chongqing Three Gorges Medical College I wanted a better future for myself and my family Michael Qiao Jia To me the key to success is one s ability and willingness to adapt to new possibilities in life and also to do what you have to do to get where you want to go even if that meant giving up my PhD in transportation engineering and pursuing a new dream leading me to Amazon in Seattle Washington State Duan Xi Now looking back I don t know how I came along nor how I will go in the future But I think it s good to keep an active attitude I went to teach in a college in Guangzhou after finishing my postgraduate program And three years later I successfully applied for the PhD program of the Chinese University of Hong Kong This is where I am Minwei Ai Handheld and Ubiquitous Computing Hans-W.
