On the Origin of Products Arthur O. Eger, Huub Ehlhardt, 2018-02-15 In this new work Arthur O Eger and Huub Ehlhardt present a Theory of Product Evolution They challenge the popular notion that we owe the availability of

products solely to genius inventors. Instead they present arguments that show that a process of variation, selection, and accumulation of know-how to make and know what function to realize provides an explanation for the emergence of new types of products and their subsequent development into families of advanced versions. This theory employs a product evolution diagram as an analytical framework to reconstruct the development history of a product family and picture it as a graphical narrative. The authors describe the relevant literature and case studies to place their theory in context. The Product Phases Theory is used to create predictions on the most likely next step in the evolution of a product, offering practical tools for those involved in new product development. **PC Mag**, 2007-04-24. Video is the Internet these days, and as the growing trend toward viewing video on mobile devices increases, too, the attention is turning toward creating a good user experience for downloading and viewing that video. One of the keys to this is delivering video in the correct format with the proper compression for that delivery. *Real World Video Compression* is one of the first books on this topic to demystify the various approaches to compression. It begins by describing the basic concepts of video compression, explains why you might choose a particular compression tool over another, and covers important workflow practices. After the groundwork is laid, readers will learn how to compress their video according to the specific requirements of their projects and will learn some best practices by following the author's own tips and recipes. Experts in the field lend their own solutions in several sidebars throughout the book, making this a valuable learning tool for anyone learning to encode video, whether they are bloggers, DVD authors, video editors, or students. Contents at a Glance: Chapter One: Understanding Video and Audio; Chapter Two: The Language of Compression; Chapter Three: Best Practices; Chapter Four: Preprocessing; Interview with a Compressionist John Howell; Chapter Five: Compression Tools; Interview with a Compressionist Nico Puertollano; Chapter Six: Compressing for DVDs; Interview with a Compressionist Ben Waggoner; Chapter Seven: Compressing for the Web; Interview with a Compressionist Jim Rohner; Chapter Eight: Compressing for Mobile; Interview with a Compressionist RYANNE HODSON; Chapter Nine: Compressing for Set Top Boxes; Interview with a Compressionist Andy Beach. In the highly accessible *REAL WORLD VIDEO COMPRESSION*, Andy Beach illuminates the dark art of encoding and provides candid insight from working professionals. Andy's fluid style and easy prose decode this often misunderstood and often misinformed world. He is the Carl Sagan of compression. Brian Gary, Filmmaker, Compressionist.
