**The Rise of English** Rosemary Salomone, Rosemary C. Salomone, 2022 A sweeping account of the global rise of English and the high stakes politics of language Spoken by a quarter of the world's population English is today's lingua franca its common tongue The language of business popular media and international politics English has become commodified for its economic value and increasingly detached from any particular nation This meteoric rise of English has many obvious benefits to communication Tourists can travel abroad with greater ease Political leaders can directly engage their counterparts Researchers can collaborate with foreign colleagues Business interests can flourish in the global economy But the rise of English has very real downsides as well In Europe imperatives of political integration and job mobility compete with pride in national language and heritage In the United States and England English isolates us from the cultural and economic benefits of speaking other languages And in countries like India South Africa Morocco and Rwanda it has stratified society along lines of English proficiency In *The Rise of English* Rosemary Salomone offers a commanding view of the unprecedented spread of English and the far reaching effects it has on global and local politics economics media education and business From the inner workings of the European Union to linguistic battles over influence in Africa Salomone draws on a wealth of research to tell the complex story of English and ultimately to argue for English not as a force for domination but as a core component of multilingualism and the transcendence of linguistic and cultural borders

*The Pivot* Kurt Campbell, 2025-05-01 From former assistant secretary of state Kurt M Campbell comes

the definitive analysis and explanation of the new major shift in American foreign policy its interests and assets to Asia There is a quiet drama playing out in American foreign policy far from the dark contours of upheaval in the Middle East and South Asia and the hovering drone attacks of the war on terror The United States is in the midst of a substantial and long term national project which is proceeding in fits and starts to reorient its foreign policy to the East The central tenet of this policy shift aka the Pivot is that the United States will need to do more with and in the Asia Pacific hemisphere to help revitalize its own economy to realize the full potential of the region s dramatic innovation and to keep the peace in the world s most dynamic region where the lion s share of the history of the twenty first century will be written This book is about a necessary course correction for American diplomacy commercial engagement and military innovation during a time of unrelenting and largely unrewarding conflict While the United States has intensified its focus on the Asia Pacific arena relative to previous administrations much more remains to be done The Pivot is about that future It explores how the United States should construct a strategy that will position it to maneuver across the East and offers a clarion call for cunning dexterity and ingenuity in the period ahead for American statecraft in the Asia Pacific region

**Internet Governance and the Global South** A. Bhuiyan, 2014-05-29 A welcome addition to Palgrave s Global Media Policy and Business series Internet Governance and the Global South documents the role of the global south in Internet policymaking and challenges the globalization theories that declared the death of the state in global decision making Abu Bhuiyan argues that the global Internet politics is primarily a conflict between the states the United States of America and the states of the global south because the former controls Internet policymaking The states of the global south have been both oppositional and acquiescing to the sponsored policies of the United States on Internet issues such as digital divide multilingualism intellectual property rights and cyber security They do not oppose the neoliberal underpinnings of the policies promoted by the United States but ask for an international framework to govern the Internet so that they can work as equal partners in setting norms for the global Internet

**The Return of Egypt** Stefano M. Torelli, 2015-09-17 Egypt has reappeared again as a leading actor in the Middle East After the fall of Mubarak the rise to power of the Muslim Brotherhood and its ouster the country has chosen its new strongman Following the elections of al Sisi Egypt is back to pursuing a pro active policy not only internally but also in the neighbourhood The restoration of the strategic axis with Saudi Arabia and the struggle against radical Islam are the two pillars of this new political phase However there are critical elements too from further deterioration of the political and civil liberties indexes to the emergence of jihadist groups in the Sinai to the enduring economic and financial difficulties As a result of these changes Europe and Italy should calibrate a new policy aimed at safeguarding their interests especially from the points of view of security stability and the fight against terrorism also promoting more inclusive practices by the Cairo government vis vis the opposition including the Muslim Brotherhood and developing policies which can help Egypt to respond to future challenges in terms of economic growth poverty alleviation demographic pressure and the creation of

employment opportunities      **Patents** Marc Baudry, Béatrice Dumont, 2017-10-30 The patent system is criticized today by some practitioners and economists In fact there is a partial disconnection between patent demographics and productivity gains but also the development of actors who do not innovate and who develop business models that their detractors equate with a capture of annuities or a dangerous commodification of patents This book provides a less Manichaean view of the position of patents in the system of contemporary innovation It first recalls that these criticisms are not new before arguing that if these criticisms have been revived it is because of a partial shift from an integrated innovation system to a much more fragmented and open system This shift accompanied the promotion of a more competitive economy The authors show that this movement is coherent with a more intensive use of patents but also one that is more focused on their signal function than on their function of direct monetary incentive to innovation      Israel's Mediterranean Gas Sujata Ashwarya, 2019-05-03 This book examines the internal and external implications of Israel's natural gas discoveries in the Eastern Mediterranean The nation's changed status from being an importer of coal and oil to that of an exporter of natural gas has consequences not only for the energy sector but also for the fragile geopolitics of the region The book Explores the challenges and issues of energy economics and governance Analyses Israel's gas diplomacy with its neighbours in the Middle East and North Africa and its potential positive impact on the amelioration of the Arab Israeli conflict Studies how Israel can avoid the deleterious impact of the Dutch disease once the government's share of the export revenues start flowing The author traces a consummate picture of history politics and conflicts that shape the economics of energy in Israel and its future trajectories A major intervention in Middle East studies this volume will be of great interest to scholars and researchers of energy studies development studies strategic studies politics diplomacy and international relations It will also be of interest to government agencies think tanks and risk management firms      Competency-Based Education Rose L.
