

To let me blood, and not restore What I have lost with cordial fruit? Sure there was wine Before my sighs did dry it: there was corn Before my tears did drown it. Is the year only lost to me? Have I no bayes to crown it? No flowers, no garlands gay? all blasted? All wasted?	10
Not so, my heart: but there is fruit, And thou hast hands. Recover all thy sigh-blown age On double pleasures: leave thy cold dispute Of what is fit and not. Forsake thy cage, Thy rope of sands, Which petty thoughts have made, and made to thee Good cable, to enforce and draw, And be thy law,	20
While thou didst wink and wouldst not see. Away; take heed: I will abroad. Call in thy deaths head there: tie up thy fears. He that forbears To suit and serve his need, Deserves his load.	25
But as I rav'd and grew more fierce and wild At every word, Me thoughts I heard one calling, <i>Child!</i>  And I reply'd, <i>My Lord.</i>	30  35

**Scotland's Choices** Iain McLean, 2014-05-30 Scotland's Choices now fully revised for the critical last few months before the referendum explains the choice that Scotland will have to make in September 2014. The authors clearly explain the issues and how each of the options would be put into place.

**The Euro Trap** Hans-Werner Sinn, 2014-07-31 This book offers a critical assessment of the history of the euro, its crisis, and the rescue measures taken by the European Central Bank and the community of states. The euro induced huge capital flows from the northern to the southern countries of the Eurozone that triggered an inflationary credit bubble in the latter, deprived them of their competitiveness, and made them vulnerable to the financial crisis that spilled over from the US in 2007 and 2008. As private capital shied away from the southern countries, the ECB helped out by providing credit from the local money printing presses. The ECB became heavily exposed to investment risks in the process and subsequently had to be bailed out by intergovernmental rescue operations that provided replacement credit for the ECB credit, which itself had replaced the dwindling private credit. The interventions stretched the legal structures stipulated by the Maastricht Treaty, which in the absence of a European federal state had granted the ECB a very limited mandate. These interventions created a path dependency that effectively made parliaments vicarious agents of the ECB's Governing Council. This book describes what the author considers to be a dangerous political process that undermines both the market economy and democracy without solving southern Europe's competitiveness problem. It argues that the Eurozone has to rethink its rules of conduct by limiting the role of the ECB, exiting the regime of soft budget constraints, and writing off public and bank debt to help the crisis countries breathe again. At the same time, the Eurosystem should become more flexible by offering its members the option of exiting and re-entering the euro, something between the dollar and the Bretton Woods system until it eventually turns into a federation with a strong political power centre and a uniform currency like the dollar.

**Defining Sustainable Development for Our Common Future** Iris Borowy, 2013-12-04 The UN World Commission on Environment and Development chaired by former Norwegian Prime Minister Gro Harlem Brundtland alerted the world to the urgency of making progress toward economic development that could be sustained without depleting natural resources or harming the environment. Written by an international group of

politicians civil servants and experts on the environment and development the Brundtland Report changed sustainable development from a physical notion to one based on social economic and environmental issues This book positions the Brundtland Commission as a key event within a longer series of international reactions to pressing problems of global poverty and environmental degradation It shows that its report *Our Common Future* published in 1987 covered much more than its definition of sustainable development as development that meets the needs of the present without compromising the ability of future generations to meet their own needs for which it became best known It also addressed a long list of issues which remain unresolved today The book explores how the work of the Commission juggled contradictory expectations and world views which existed within the Commission and beyond and drew on the concept of sustainable development as a way to reconcile profound differences The result was both an immense success and disappointment Coining an irresistibly simple definition enabled the Brundtland Commission to place sustainability firmly on the international agenda This definition gained acceptability for a potentially divisive concept but it also diverted attention from underlying demands for fundamental political and social changes Meanwhile the central message of the Commission the need to make inconvenient sustainability considerations a part of global politics as much as of everyday life has been side lined The book thus assesses to what extent the Brundtland Commission represented an immense step forward or a missed opportunity

*Educating Tomorrow's Engineers* Great Britain: Parliament: House of Commons: Science and Technology Committee, 2013-02-08 In the UK we teach young people to become computer users and consumers rather than programmers and software engineers This is creating a chronic skills gap in ICT We need around 82 000 engineers and technicians just to deal with retirements up to 2016 and 830 000 SET professionals by 2020 On the plus side the Government's proposal to include computer science as a fourth science option to count towards the EBac is welcomed The Committee also welcomes the EBac's focus on attainment of mathematics and science GCSEs but is concerned that subjects such as Design and Technology D T might be marginalised A Technical Baccalaureate TechBac is being designed but if it is to be a success schools should be incentivised to focus on the TechBac by making it equivalent to the EBac Reforms to vocational education following the Wolf Review meant that Level 2 of the Engineering Diploma a qualification highly regarded would count as equivalent to one GCSE despite requiring curriculum time and effort equivalent to several GCSEs The Engineering Diploma

however is currently being redesigned as four separate qualifications The Committee also expressed concerns over the Department for Education's DfE lack of clarity on its research budget and use of evidence in decision making The DfE needs to place greater focus on gathering evidence before changes to qualifications are made and must leave sufficient time for evidence to be gathered on the effectiveness of policies before introducing further change The possibility of gathering evidence from randomised controlled trials RCTs should be seriously considered

definitive analysis and explanation of the new major shift in American foreign policy its interests and assets to Asia There is a quiet drama playing out in American foreign policy far from the dark contours of upheaval in the Middle East and South Asia and the hovering drone attacks of the war on terror The United States is in the midst of a substantial and long term national project which is proceeding in fits and starts to reorient its foreign policy to the East The central tenet of this policy shift aka the Pivot is that the United States will need to do more with and in the Asia Pacific hemisphere to help revitalize its own economy to realize the full potential of the region s dramatic innovation and to keep the peace in the world s most dynamic region where the lion s share of the history of the twenty first century will be written This book is about a necessary course correction for American diplomacy commercial engagement and military innovation during a time of unrelenting and largely unrewarding conflict While the United States has intensified its focus on the Asia Pacific arena relative to previous administrations much more remains to be done The Pivot is about that future It explores how the United States should construct a strategy that will position it to maneuver across the East and offers a clarion call for cunning dexterity and ingenuity in the period ahead for American statecraft in the Asia Pacific region     The Schism of '68 Alana
