

JANUARY ... DOES IT BRING YOU JOY?

- 1 January is the time for renewal on many fronts. It's the time of the year to re-evaluate everything. If something or someone doesn't bring you joy, it's pretty pointless carrying on with it. If we want the best, we must do our best. We must keep our family space safe and secure so that we are thriving as a people and as a nation. 5
- 2 In order to live their best lives, people are spreading themselves thinner and thinner with multiple streams of income. In the process we earn more but live less, we lose our focus of what is important.
- 3 With social media, keeping up with other Instagrammers are having a devastating effect on self-perception. Everything appears to be real perfect, but the fabric of our society is frazzled. Use January to take stock and start navigating new ways of doing things. Instead of multiple streams of sole sessions, travel more, and connect with people and places that bring you joy. 10

Exemplar Series: Assessing student performance, grades 9-12 Miles Myers, Elizabeth Spalding, 1997 **Schooling by Design** Grant Wiggins, Jay McTighe, 2007-07-15 Why, despite years of trying, have efforts to achieve lasting effective school reform fallen short? What curricular and policy elements must be in place to move forward? How should the roles of teachers and education leaders be defined to best support the point of school? Grant Wiggins and Jay McTighe answer these and other questions in *Schooling by Design: Mission, Action, and Achievement*. Building on the premise of Understanding by Design, their acclaimed framework for curriculum, instruction, and assessment, the authors present a compelling argument for using the same approach to reach a grand goal: the reform of schooling as a whole. In their view, reform rests on six pillars: A relentless focus on the long-term mission of school: enabling learners to demonstrate understanding and mature habits of mind. A curriculum and assessment framework that honors the mission and ensures that content coverage is no longer the accepted approach to instruction. A set of principles of learning that support all decisions.

Designing Assessment for Quality Learning Claire Wyatt-Smith, Valentina Klenowski, Peta Colbert, 2014-03-10 This book brings together internationally recognised scholars with an interest in how to use the power of assessment to improve student learning and to engage with accountability priorities at both national and global levels. It includes distinguished writers who have worked together for some two decades to shift the assessment paradigm from a dominant focus on assessment as measurement towards assessment as central to efforts to improve learning. These writers have worked with the teaching profession and in so doing have researched and generated key insights into different ways of understanding assessment and its relationship to learning. The volume contributes to the theorising of assessment in contexts characterised by heightened accountability requirements and constant change. The book's structure and content reflect already significant and growing international interest in assessment as contextualised practice as well as theories of learning and teaching that underpin and drive particular assessment approaches. Learning theories and practices, assessment literacies, teachers' responsibilities in assessment, the role of leadership and assessment futures are the organisers within the book's structure and content. The contributors to this book have in common the view that quality assessment and quality learning and teaching are integrally related. Another shared view is that the alignment of assessment with curriculum, teaching and learning is a linchpin to efforts to improve both learning opportunities and outcomes for all. Essentially the book presents new perspectives on the enabling power of assessment. In so doing the writers recognise that validity and reliability, the traditional canons of assessment, remain foundational and therefore necessary. However, they are not of themselves sufficient for quality education. The book argues that assessment needs to be radically reconsidered in the context of unprecedented societal change. Increasingly, communities are segregating more by wealth, with clear signs of social, political, economic and environmental instability. These changes raise important issues relating to ethics and equity, taken to be core dimensions in enabling the power of assessment to contribute to quality learning for all. This book offers readers new knowledge about how assessment can be used to re-engage learners across all phases of education.
