H. Walter, 2003-04-10 Insect Pest Management and Ecological Research explores the ecological research required for development of strategies to manage pest insects with particular emphasis on the scientific principles involved in the design and conduct of pest related research Although the connection between Integrated Pest Management IPM and ecology has been long appreciated their specific relationship to one another has remained vague until now Here Gimme Walter develops the first general model of the entomological research requirements of IPM He shows how to navigate through the diversity of options presented by current
