**Advanced Placement Economics** John S. Morton, 2003 The teacher guide accompanies the student activities books in macro and microeconomics for teaching collegelevel economics in AP Economics courses The publication contains course outlines unit plans teaching instructions and answers to the student activities and sample tests The Economics of Federal Subsidy Programs, 1972 **Constructing Economic Science** Keith Tribe, 2021-11-26 An accessible account of the role of the modern university in the creation of economics During the late nineteenth century concerns about international commercial rivalry were often expressed in terms of national provision for training and education and the role of universities in such provision It was in this context that the modern university discipline of economics emerged The first undergraduate

economics program was inaugurated in Cambridge in 1903 but this was merely a starting point Constructing Economic Science charts the path through commercial education to the discipline of economics and the creation of an economics curriculum that could then be replicated around the world Rather than describing this transition epistemologically as a process of theoretical creation Keith Tribe shows how the new science of economics was primarily an institutional creation of the modern university He demonstrates how finance student numbers curricula teaching new media the demands of employment and more broadly the international perception that industrializing economies required a technically skilled workforce all played their part in shaping economics as we know it today This study explains the conditions originally shaping the science of economics providing in turn a foundation for an understanding of the way in which this new language transformed public policy
