

Student Exploration: Natural Selection

Background: Background: Charles Darwin's theory of evolution, which describes how species change over time, is one of the most important concepts in biology.

Before beginning this exploration, please review the following background information:

The peppered moth (*Biston betularia*) is a common moth found in Europe. In 1800, most moths were light-colored. However, by 1850, a dark-colored moth, the peppered moth, had become more common. This change in the moth's color is an example of natural selection.

1. Which moth is better suited to its environment? (Hint: Think about the color of the moth.)
 Answer: **The dark-colored moth is better suited to its environment.**

2. Which moth is better suited to its environment? (Hint: Think about the color of the moth.)
 Answer: **The light-colored moth is better suited to its environment.**

Background: The peppered moth is a common moth found in Europe. In 1800, most moths were light-colored. However, by 1850, a dark-colored moth, the peppered moth, had become more common. This change in the moth's color is an example of natural selection.

1. Which moth is better suited to its environment? (Hint: Think about the color of the moth.)

A. The dark-colored moth is better suited to its environment.

B. The light-colored moth is better suited to its environment.

C. **Natural selection is a process that leads to the development of new traits in a population.**

2. If a population of moths is exposed to a new environment, which type of moth is most likely to survive?
 Answer: **The light-colored moth is most likely to survive.**

Activity A:

Background:

Give the class a copy of the following text:

- 1. The dark-colored moth is better suited to its environment.
- 2. The light-colored moth is better suited to its environment.

Background: During the 18th century, the peppered moth was a common moth found in Europe. In 1800, most moths were light-colored. However, by 1850, a dark-colored moth, the peppered moth, had become more common. This change in the moth's color is an example of natural selection.

Idea-Based Learning Edmund J. Hansen, 2023-07-03 Synthesizing the best current thinking about learning course design and promoting student achievement this is a guide to developing college instruction that has clear purpose is well integrated into the curriculum and improves student learning in predictable and measurable ways The process involves developing a transparent course blueprint focused on a limited number of key concepts and ideas related tasks and corresponding performance criteria as well as on frequent practice opportunities and early identification of potential learning barriers Idea based Learning takes as its point of departure the big conceptual ideas of a discipline that give structure and unity to a course and even to the curriculum as opposed to a focus on content that can lead to teaching sequences of loosely related topics and aligns with notions of student centered and outcomes based learning environments Adopting a backwards design model it begins with three parallel processes first identifying the material that is crucial for conceptual understanding second articulating a clear rationale for how to choose learning outcomes based on student needs and intellectual readiness and finally aligning the learning outcomes with the instructional requirements of the authentic performance tasks The resulting syllabi ensure cohesion between sections of the same course as well as between courses within a whole curriculum assuring the progressive development of students skills and knowledge Key elements of IBL include Helping students see the big picture Building courses around one or more authentic performance tasks that illuminate the core concepts of the discipline Clearly identifying performance criteria for all tasks Incorporating practice in the competencies that are deemed important for students success By placing the onus of learning on the student liberating faculty to take on the role of learning coaches Designing tasks that help students unlearn simplistic ideas and replace them with improved understandings Edmund Hansen expertly guides the reader through the steps of the process providing examples along the way and concluding with a sample course design document and syllabus that illustrate the principles he propounds Teaching About Evolution and the Nature of Science National Academy of Sciences, Division of Behavioral and Social Sciences and Education, Board on Science Education, Working Group on Teaching Evolution, 1998-04-06 Today many school students are shielded from one of the most important concepts in modern science evolution In engaging and conversational style Teaching About Evolution and the Nature of Science provides a well structured framework for understanding and teaching evolution Written for teachers parents and community officials as well as scientists and educators this book describes how evolution reveals both the great diversity and similarity among the Earth s organisms it explores how scientists approach the question of evolution and it illustrates the nature of science as a way of knowing about the natural world In addition the book provides answers to frequently asked questions to help readers understand many of the issues and misconceptions about evolution The book includes sample activities for teaching about evolution and the nature of science For example the book includes activities that investigate fossil footprints and population growth that teachers of science can use to introduce principles of evolution

Background information materials and step by step presentations are provided for each activity In addition this volume Presents the evidence for evolution including how evolution can be observed today Explains the nature of science through a variety of examples Describes how science differs from other human endeavors and why evolution is one of the best avenues for helping students understand this distinction Answers frequently asked questions about evolution Teaching About Evolution and the Nature of Science builds on the 1996 National Science Education Standards released by the National Research Council and offers detailed guidance on how to evaluate and choose instructional materials that support the standards Comprehensive and practical this book brings one of today s educational challenges into focus in a balanced and reasoned discussion It will be of special interest to teachers of science school administrators and interested members of the community

EVO Teachers Guide Rodger W. Bybee,John Feldman,2012 In this film you ll learn among other things that evolution and religion are indeed compatible ways of looking at the world that Darwin was a creationist before he was an evolutionist and that cooperation is just as important as competition in the struggle for existence From Hummingbird Films website

ENC Focus Review ,2003 College Teaching and the Development of Reasoning Robert G. Fuller,Thomas C. Campbell,Dewey I. Dykstra,Scott M. Stevens,2009-10-01 This book is intended to offer college faculty members the insights of the development of reasoning movement that enlighten physics educators in the late 1970s and led to a variety of college programs directed at improving the reasoning patterns used by college students While the original materials were directed at physics concepts they quickly expanded to include other sciences and the humanities and social sciences On going developments in the field will be included The editors have introduced new topics including discussions of Vygotsky s ideas in relation to those of Piaget of science education research progress since 1978 of constructivist learning theory applied to educational computer games and of applications from anthropology to zoology These materials are especially relevant for consideration by current university faculty in all subjects

Content Area Reading Richard T. Vacca,1996

Pathways to Scientific Teaching Diane Ebert-May,Janet Hodder,2008 This book is based on a series of Pathways articles that illustrate effective instructional methods to help students gain conceptual understanding in ecology It presents a philosophy of scientific teaching based on pedagogical principles designed to improve learning

Tools for Teaching Conceptual Understanding. Elementary Julie Stern,Nathalie Lauriault,Krista Ferraro,2017-09-16 Harness natural curiosity for conceptual understanding Young children are naturally curious asking deep questions about complex concepts This tendency is a talent that can be nurtured so that children grow to be deep thinkers and innovators later in life However in our complex world it is impossible to teach students everything they need to know Pushing more factual content ignores what we know about how children learn and endangers their love of learning Concept based teaching helps young learners uncover conceptual relationships in a way that is developmentally appropriate Readers of this guide will learn Why conceptual learning is a natural fit for children Strategies for introducing conceptual learning Instructional strategies to help students uncover and

transfer concepts How to write lessons assess understanding and differentiate in a concept based classroom How concept based teaching aligns with best practices and initiatives Written for educators who strive to cultivate conceptual understanding while honoring students innate curiosity this is a must have road map for implementing concept based teaching in elementary classrooms This book provides the research and resources educators need to help students take ownership of their learning It fosters students curiosity about their environment and it allows them to explore and become life long learners Ellen Asregadoo Fifth Grade Teacher Public School 190 Brooklyn NY This is an important book for all teachers We need to be honoring our students as thinkers who deserve developmentally appropriate intellectual rigor in the classroom We will not achieve this in our traditional coverage based classroom I am so inspired and can t wait to start this journey making mistakes and learning along the way Sarah Gat Second Grade Teacher Ecole Arbour Vista Public School Guelph Ontario

Handbook of Research on Learning Outcomes and Opportunities in the Digital Age Wang, Viktor, 2015-12-22 Education and learning opportunities bring about the potential for individual and national advancement As learners move away from traditional scholarly media and toward technology based education students gain an advantage with technology in learning about their world and how to interact with modern society The Handbook of Research on Learning Outcomes and Opportunities in the Digital Age provides expert research relating to recent technological advancements technology and learning assessments and the effects of technology on learning environments making it a crucial reference source for researchers scholars and professors in various fields

Kid's Eye View of Science Susan Kovalik, Karen D. Olsen, 2010-09-08 Examines learning science from multiple perspectives including the child's perspective guides readers through the steps of igniting students natural sense of wonder incorporating brain research integrating science concepts with other subjects and applying science to daily life demonstrates how to teach science conceptually through the lens of big ideas such as change interdependence and adaptation
