Geomorphology Richard J. Chorley, Stanley A. Schumm, David E. Sugden, 2019-04-10 Originally published in 1984, this major text covers the whole discipline of geomorphology, presenting a clear and comprehensive overview of the field, drawing on the full range of modern research. Landforms and their formative processes are treated on a broad spectrum of spatial scales, and examples are drawn from the major geological, climatic and biotic environments. The book is divided conveniently into some 170 clearly defined sections to allow readers to make the most efficient use of those parts of the text relevant to their particular needs. After introducing the basic concepts such as systems analysis, morphologic and cascading systems, the historical evolutionary approach and process response, geomorphology, the book moves on to the geological background to geomorphology and then the extensive third part deals with the geomorphic processes and responding landforms. Part four examines climatic geomorphology and the appendix touches on applied geomorphology, especially fluvial processes.

Geomorphology Ken Shaw, 2016-05-25 Geomorphology is an important field in the discipline of earth science that aims to analyze the formation of earth's topographic features by various physical and chemical interactions. Some of the chapters included in this book discuss significant concepts of geomorphology like data measurement and analysis, interaction between different spheres, remote sensing and modeling of earth surface processes etc. It aims to shed light on some of the unexplored aspects of geomorphology and the recent researches in this field which will make this book an invaluable resource for academicians and professionals alike.
