Language, Literacy, and Learning in the STEM Disciplines Alison L. Bailey, Carolyn A. Maher, Louise C. Wilkinson, 2018-02-01 With a focus on what mathematics and science educators need to know about academic language used in the STEM disciplines this book critically synthesizes the current knowledge base on language challenges inherent to learning mathematics and science with particular attention to the unique issues for English learners These key questions are addressed When and how do students develop mastery of the language registers unique to mathematics and to the sciences How do teachers use assessment as evidence of student learning for both accountability and instructional purposes Orienting each chapter with a research review and drawing out important Focus Points chapter authors examine the obstacles to and latest ideas for improving STEM literacy and discuss implications for future research and practice

South African Schooling: The Enigma of Inequality Nic Spaull, Jonathan D. Jansen, 2019-11-05 This volume brings together many of South Africa s leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90 10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that

demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people s future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI The Math Pact, Middle School Sarah B. Dougherty, 2020-09-19 A schoolwide solution for students mathematics success Do you sometimes start to teach a mathematics concept and feel like you re staring at a sea of bewildered faces What happens when you discover students previously learned a calculation trick or a mnemonic that has muddled their long term understanding When rules seem to change from year to year teacher to teacher or school to school mathematics can seem like a disconnected mystery for students Clear up the confusion with a Mathematics Whole School Agreement Expanded from the highly popular Rules that Expire series of NCTM articles this essential guide leads educators through the collaborative step by step process of establishing a coherent and consistent learner centered and equitable approach to mathematics instruction Through this work you will identify streamline and become passionate about using clear and consistent mathematical language notations representations rules and generalizations within and across classrooms and grades Importantly you ll learn to avoid rules that expire tricks that may seem to help students in one grade but hurt in the long run Features of this book include Abundant grade specific examples Effective working plans for sustainability Barrier busting tips to dos and try it outs Practical templates and checklists PLC prompts and discussion points When teachers unite across grades students hit the ground running every year Take the next step together as a team and help all your students build on existing understanding to find new success and most importantly love learning and doing mathematics *Students at Risk of School Failure* José Jesús Gázquez, José Carlos Núñez, 2018-10-18 The main objective of this Research Topic is to determine the conditions that place students at risk of school failure identifying student and context variables In spite of the fact that there is currently little doubt about how one learns and how to teach in some countries of the developed world there is still there is a high rate of school failure Although the term school failure is a very complex construct insofar as its causes consequences and development from the field of educational psychology the construct student engagement has recently gained special interest in an attempt to deal with the serious problem of school failure School engagement builds on the anatomy of the students

involvement in school and describes their feelings behaviors and thoughts about their school experiences So engagement is an important component of students school experience with a close relationship to achievement and school failure Children who self set academic goals attend school regularly and on time behave well in class complete their homework and study at home are likely to interact adequately with the school social and physical environments and perform well in school In contrast children who miss school are more likely to display disruptive behaviors in class miss homework frequently exhibit violent behaviors on the playground fail subjects be retained and if the behaviors persist quit school Moreover engagement should also be considered as an important school outcome eliciting more or less supportive reactions from educators For example children who display school engaged behaviors are likely to receive motivational and instructional support from their teachers The opposite may also be true But what makes student engage more or less The relevant literature indicates that personal variables e g sensory motor neurodevelopmental cognitive motivational emotional behavior problems learning difficulties addictions social and or cultural variables e g negative family conditions child abuse cultural deprivation ethnic conditions immigration or school variables e g coexistence at school bullying cyberbullying may concurrently hinder engagement preventing the student from acquiring the learnings in the same conditions as the rest of the classmates

Cognition and Second Language Acquisition Thorsten Piske, Anja Steinlen, 2022-07-25 This volume examines interactions between second foreign language acquisition and the development of cognitive abilities in learners who acquire an additional language in preschools primary or secondary schools The chapters explore possible links between cognitive and linguistic skills displayed by multilingual learners This book should appeal to different kinds of readers such as linguists psychologists and language teachers

Institutionalizing Health and Education for All Colette Chabbott, 2014-11-15 Health for All and Education for All have been rallying cries for a host of international development activities for more than a quarter century Where did these global goals come from Why have the health goals seemingly advanced so much faster than those in education In this book author Colette Chabbott explores the foundational role that international development organizations and the innovations they champion have played in shaping and advancing such goals Chabbott demonstrates the importance of science and measurement in rendering some innovations more universal and compelling than others Her analysis includes in depth case studies of innovations developed at the grassroots and scaled up at the national and international levels by the International Center for Diarrheal Disease Research and by BRAC once a Bangladeshi now a major international NGO These studies all suggest that greater investment in new types of education research based in the Third World but with strong ties to research centers of international scope in the First World are likely the prerequisites for achieving better cheaper faster universal education This important book will provoke scholars students and international development practitioners to think more deeply about the cultural and scientific underpinnings of education and international development The authors careful analyses are particularly needed as the international community defines new
