Women's Under-Representation in the Engineering and Computing Professions: Fresh Perspectives on a Complex Problem Kathleen Buse, Catherine Hill, Romila Singh, 2018-06-21 Understanding the many complexities that define gender inequality has been described by researchers as a grand challenge. Novel insights, innovation, a broader community to conduct research and to ascertain effective interventions are essential in the challenge to create organizations that are gender equal. As such, this Research Topic in *Frontiers in Psychology* addresses the underrepresentation of women in engineering and computing as a complex but solvable problem. This Research Topic seeks to inform the global community about advances in understanding the underrepresentation of women in engineering and computing with a focus on what enables change. Further, this Topic will promote fresh perspectives, innovative methodologies, and mixed method approaches important to accelerating the pace of change.

Science Education for the Future Norman Reid, Khaled Ahmed Al-Madani, Fatheya Mahmood Al-Ahmadi, 2025-04-01 This book draws on the wealth of worldwide research into science education to establish a set of key principles for teaching secondary science. It considers the aims of science education and the themes and topics that should be included in the curriculum and how these can be effectively taught and assessed in a variety of contexts. Offering a framework for the training and professional development of science teachers, the chapters answer key questions such as: How can I help my students to make sense of difficult areas in my subject? What is meant by understanding and how can I help my students achieve it? Is it possible to teach scientific thinking and how can I do it? What about learner attitudes when they are sometimes negative? What are the different ways to teach in the sciences that are effective? How can I make learning in the laboratory more efficient and effective? How can I employ assessment as a positive aid to learning? Including reflective questions, tasks, and diagrams, this is essential reading for all student and practising secondary science teachers.

Report Series: Committee on Astronomy and Astrophysics National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Board on Physics and Astronomy, Space Studies Board, Committee on Astronomy and Astrophysics, 2017-06-08 The 2010 astronomy and astrophysics decadal survey *New Worlds, New Horizons in Astronomy and Astrophysics* laid out an exciting portfolio of recommended activities to guide the agencies' research programs over the period 2012–2021. The newly constituted Committee on Astronomy and Astrophysics (CAA) is tasked with monitoring the progress of the survey's recommended priorities. The CAA met in conjunction with Space Science Week 2017 in Washington, D.C. on March 28–30, 2017. This was the first meeting at which the CAA could produce a report and in advance of that meeting the CAA received a question from NASA about an upcoming Small Explorer (SMEX) mission call. This report addresses whether there may or may not be sufficient compelling science motivations for a SMEX-sized mission to justify a SMEX Announcement of Opportunity (AO) in 2018 or 2019 as is currently planned.
