Name:

Class: X

Sec:

Date of submission 30/04/2021

**General Instruction :**

- Write the answers for the following questions in your respective subject notebooks.

1. A wire of length  $l$ , made of material resistivity  $\rho$  is cut into two equal parts. The resistivity of the two parts are equal to,

(a)  $\rho$                       (b)  $\rho/2$                       (c)  $2\rho$                       (d)  $4\rho$

2. **Assertion and Reason – Practice Questions**

**Assertion:** Bending a wire does not affect electrical resistance.

**Reason :** Resistance of a wire is proportional to resistivity of material.

- a) Both A and R are true and R is the correct explanation of A.  
b) Both A and R are true but R is not the correct explanation of A.  
c) A is true but R is false.  
d) A is false but R is true.

**Advances in Simulation of Wing and Nacelle Stall** Rolf Radespiel, Reinhard Niehuis, Norbert Kroll, Kathrin Behrends, 2015-07-09 The book reports on advanced solutions to the problem of simulating wing and nacelle stall as presented and discussed by internationally recognized researchers at the Closing Symposium of the DFG Research Unit FOR 1066 Reliable simulations of flow separation on airfoils wings and powered engine nacelles at high Reynolds numbers represent great challenges in defining suitable mathematical models computing numerically accurate solutions and providing comprehensive experimental data for the validation of numerical simulations Additional problems arise from the need to consider airframe engine interactions and inhomogeneous onset flow conditions as real aircraft operate in atmospheric environments with often large distortions The findings of fundamental and applied research into these and other related issues are reported in detail in this book which targets all readers academics and professionals alike interested in the development of advanced computational fluid dynamics modeling for the simulation of complex aircraft flows with flow separation

**The English Professor** Margaret R. O'Leary/Dennis S. O'Leary, 2016-02-04 Across the span of more than forty years Raphael Dorman O'Leary a professor of English rhetoric and English literature taught his students at the University of Kansas to think straight to put sinew into their sentences and to embrace the magnificent literary treasures of their mother tongue The English Professor by authors Margaret R O'Leary and Dennis S O'Leary offers a narrative of the life work and times of a revered Midwestern university English teacher This memoir narrates how the professor born in 1866 was raised on a Kansas farm in the post bellum era Like his father before him he was committed to a life of learning and teaching His colleagues knew him for his unpretentious exterior honesty and integrity and his flashing anger at cheapness vulgarity pretense and above all charlatanism When Professor O'Leary died

after a short illness in 1936 his personal effects passed through two generations to his grandson Dennis S O Leary who with his wife Margaret discovered his papers while restoring a family house The trove of material served as the core resource for the compilation of The English Professor It provides insights into the histories of Kansas and the University of Kansas and of Harvard University as well as perspectives on higher education including the teaching of English rhetoric language literature journalism and oratory in the United States     *Latest Developments in Civil Engineering* Krishna Kant Pathak,J. M. S. J. Bandara,Ramakant Agrawal,2023-10-02 This book comprises select proceedings of the International Conference on Recent Advances in Civil Engineering RACE 2022 The contents of this book focus on the recent advancements and innovations in the field of civil engineering and various related areas such as design and development of new sustainable and smart building materials performance analysis and simulation of steel structures design and performance optimization of concrete structures structural engineering geotechnical engineering water resources engineering and hydraulics transportation and bridge engineering building services design surveying and remote sensing engineering management and renewable energy This book serves as a useful reference to researchers and professionals in the field of civil engineering     Comprehensive Systems Biomedicine Pietro Lio,Enrico Capobianco,2014-12-03 Systems Biomedicine is a field in perpetual development By definition a translational discipline it emphasizes the role of quantitative systems approaches in biomedicine and aims to offer solutions to many emerging problems characterized by levels and types of complexity and uncertainty unmet before Many factors including technological and societal ones need to be considered In particular new technologies are providing researchers with the data deluge whose management and exploitation requires a reinvention of cross disciplinary team efforts The advent of omics and high content imaging are examples of advances de facto establishing the necessity of systems approaches Hypothesis driven models and in silico validation tools in support to all the varieties of experimental applications call for a profound revision The focus on phases like mining and assimilating the data has substantially increased so to allow for interpretable knowledge to be inferred Notably to be able to tackle the newly generated data dimensionality heterogeneity and complexity model free and data driven intensive applications are increasingly shaping the computational pipelines and architectures that quant specialists set aside of the high throughput genomics transcriptomics proteomics platforms As for the societal aspects in many advanced societies health care needs now more than in the past to address the problem of managing ageing populations and their complex morbidity patterns In parallel there is a growing research interest on the impact that cross disciplinary clinical epidemiological and quantitative modelling studies can have in relation to outcomes potentially affecting the quality of life of many people Complex systems including those characterizing biomedicine are assessed in both their functionality and stability and also relatively to the capacity of generating information from diversity variation and complexity Due to the combined interactions and effects such systems embed prediction power available for instance in both target identification or marker discovery or more generally for conducting inference about

patients pathological states i.e. normal versus disease diagnostic or prognostic analysis and preventive assessment e.g. risk evaluation The ultimate goal personalized medicine will be achieved based on the confluence of the system's predictive power to patient specific profiling
