Failure Up Close Jay P. Greene, Michael Q. McShane, 2018-01-17 For many reasons failure in education reform is rarely admitted Even though it is incredibly hard work to try and improve the enormous and diverse American education system because there are political consequences of admitting that a particular effort did not live up to its promises and pressure from philanthropic funders to show success unsuccessful efforts are often swept under the rug or papered over with public relations efforts that avoid wrestling with the tough realities of educational improvement This doesn't help anyone As any educator will tell you failure is an essential part of learning Insofar as education reform needs to be a learning movement itself it has to be able to admit where it has failed and learn from it Failure Up Close engages a select group of scholars from across the ideological spectrum to examine particular education reform efforts of recent years that have not succeeded and offer lessons for school and system improvement that can be learned from them Rather than view failure as negative this volume looks at failure as an opportunity to learn and grow In fact the editors endeavored to find authors that would analyze reforms for which they had some fundamental sympathy The goal is not to bash particular efforts or castigate their supporters but rather to help those supporters understand how to do what they do better and ultimately do better for children

Climate Change Impacts and Sustainability Pius Z. Yanda, Claude G. Mung'ong'o, Edmund B. Mabhuye, 2020-06-02 This book provides a detailed analysis of the economic and environmental impacts of climate change on the tropical ecosystems in Tanzania Topics covered include agriculture marine resources wildlife and weather forecasting

The analyses concentrate on real and potential impacts of climate change focusing on changes in temperature and precipitation Adaptive capacity and strategies for enhancing resilience such as changing crop types and crop patterns in farming are described Food in the Air and Space Richard Foss,2014-12-11 In the history of cooking there has been no more challenging environment than those craft in which humans took to the skies The tale begins with meals aboard balloons and zeppelins where cooking was accomplished below explosive bags of hydrogen ending with space station dinners that were cooked thousands of miles below This book is the first to chart that history worldwide exploring the intricacies of inflight dining from 1783 to the present day aboard balloons zeppelins land based aircraft and flying boats jets and spacecraft It charts the ways in which commercial travelers were lured to try flying with the promise of familiar foods explains the problems of each aerial environment and how chefs engineers and flight crew adapted to them and tells the stories of pioneers in the field Hygiene and sanitation were often difficult and cultural norms and religious practices had to be taken into account The history is surprising and sometimes humorous at times some ridiculous ideas were tried and airlines offered some strange meals to try to attract passengers It s an engrossing story with quite a few twists and turns and this first book on the subject tells it with a light touch Subject Guide to Books in Print ,1971
