Grade11 Economics Paper2 Final Exam:

Intermediate Microeconomics Steve Erfle, 2017-09-14 The overarching premise of this text is that microeconomics is most effectively learned in an active learning interactive environment Students have access to more than 200 Interactive Excel Figures in the online text that allow them to move the graphs using sliders and click boxes This interactivity helps students understand how graphic elements relate to one another These files do not require knowledge of Excel More figures than are typical and many of the figures involve multiple scenarios of the same basic graph Often the text employs interactive questions that require interpreting these scenarios questions posed are answered at the bottom of the page Despite the geometric orientation this text is not light on algebraic analysis The geometry is backed up by the relevant algebra More than 500 equations are numbered for easy reference both within and across chapters And just like the geometry the algebra is essentially error free because it was used to create the graphs The geometric orientation is perfect for the non calculus enhanced classroom but the text can be readily used in a calculus based class because a calculus treatment of the material is provided in appendices and endnotes and calculus based problems are included in the Intermediate Microeconomics An Interactive Approach Workbook

Corporate DNA Arnold Kransdorff, 2017-05-15 For more than half a century the developed world has been chasing productivity. It's financed our wealth but that part of output on which our continued prosperity depends productivity growth is petering out. The traditional scapegoat has been the dearth of worker skills. But the worker skills base has never been higher. The other explanation is that it is managers who are not giving full value to their employers. The way they're making decisions is conferring virtually no upside potential which means they're leaving us wide open for experience poor competitors to step into our experience rich shoes. Exactly as Japan did in the 1960s and the so called BRICK countries Brazil Russia India China especially China and Korea are threatening now. If creeping uncompetitiveness is not to overtake us from where are the next round of productivity gains to come from? Identifying some gaping holes in the way managers are taught to manage this book outlines both the size of the problem and a solution. Businesses and other organizations the author says have to substantially raise the quality of their decision making. For this to happen they need to be much better experiential learners. And for experiential learning to take place companies and other institutions have to better manage their corporate DNA. The institution specific experiences otherwise known as Organizational Memory OM which characterizes any organization's ability to perform is the single biggest influence on decision making excellence. It is a factor of production that has already been paid for at great expense yet is readily discarded in the backwash of the biggest change in workplace practice for more than a century the actively encouraged flexible labour market. *Corporate DNA* explains why this key component of intellectual capital should be better managed can be better managed and particularly how it can be used to help organizations reduce the pandemic of repeated mistakes reappear.
