Organizational Behavior History

- Formal study of OB began in the 1890's. During that time Frank and Lillian Gilbreth and Frederick Winslow Taylor identified positive effects of precise instructions, goal setting, and rewards on motivation. In 1911 Taylor published his work "Principles of Scientific Management". Henry Ford applied Taylor's theories in Ford Motor Company in producing the Ford Model T automobile reducing assembly time and price of the car.
- Scientific management increased the monotony of work.
- After WWI attention shifted to understanding the role of human factors and psychology in the organization. This interest was spawned by the Hawthorne Experiment. The Hawthorne experiment was conducted by Elton Mayo at Western Electric's Hawthorne plant.
- The original purpose of the study was to examine how different aspects of the work environment such as lighting, timing of breaks, and the length of workday had on worker productivity.
