*The Education Invasion* Joy Pullmann, 2017-03-14 Most Americans had no idea what Common Core was in 2013 according to polls But it had been creeping into schools nationwide over the previous three years and children were feeling its effects They cried over math homework so mystifying their parents could not help them even in elementary school They read motley assortments of informational text instead of classic literature They dreaded the high stakes tests in unfamiliar formats that were increasingly controlling their classrooms How did this latest and most sweeping reform of American education come in mostly under the radar Joy Pullmann started tugging on a thread of reports from worried parents and frustrated teachers and it led to a big tangle of history and politics intrigue and arrogance She unwound it to discover how a cabal of private foundation honchos and unelected public officials cooked up a set of rules for what American children must learn in core K 12 classes and how the Obama administration pressured states to adopt them Thus a federalized education scheme took root despite legal prohibitions against federal involvement in curriculum Common Core and its testing regime were touted as an absolute game changer in public education yet the evidence so far suggests that kids are actually learning less under it Why then was such a costly and disruptive agenda imposed on the nation s schools Who benefits And how can citizens regain local self governance in education so their children s minds will be fed a more nourishing intellectual diet and

be protected from the experiments of emboldened bureaucrats The Education Invasion offers answers and remedies

*Black Diamonds from the Treasure State* Robert A. Schalla, 2024-02-06 In the late 19th century railroads played a crucial role in the development of Montana's economy Robert A Schalla examines early efforts to bring rail transport to the New World Mining District near the northeast corner of Yellowstone National Park and Red Lodge Bear Creek Coal Field in south central Montana The saga began with a chance discovery in 1866 and follows the exploits of individuals who worked to bring rail transport to the mines of southern

Montana Starting with Northern Pacific's unsuccessful efforts to build a railroad through Yellowstone this story follows the struggles of various privately financed schemes to develop the vast mineral wealth of these two regions A youthful entrepreneur from Milwaukee succeeded in financing a railroad to the coal fields but his plan to extend the line to the national park runs afoul of Howard Elliott president of the Northern Pacific who was determined to drive him out of business The story dives into the motivations and background of these individuals and their ultimate triumphs and failures The completion of the Montana Wyoming Southern Railroad MW S in 1906 resulted in the creation of three new towns and six separate mining operations The MW S was one of the few privately owned lines in Montana that despite forces aligned against it maintained its independence until it was abandoned For nearly fifty years it formed an important part of the state's economy as the Bear Creek mines supplied private commercial and industrial consumers with some of the highest quality coal in the state *The Commercial & Financial Chronicle* ,1901 *The Commercial and Financial Chronicle* ,1899
