several decades museums have shifted as a field from a focus on collections to a focus on connecting with audiences More recently museums must confront political polarization and a decreasing sense of trust in nearly every public institution As a result few institutions are better positioned to serve the country than museums In fact polls show that museums rank among the most trusted institutions in the country regardless of political belief During tumultuous times this trust means that museums have a unique and important responsibility to fulfill their civic mission A century ago John Cotton Dana argued that the most important thing a museum can do is produce a public benefit The Civic Mission of Museums argues that museums play an essential role in the cultivation of engaged and informed citizens The book outlines a spectrum of civic learning that includes civic knowledge civic mindset civic skillset and civic action It offers concrete examples of impactful civic programming exhibits and public engagement from a diverse set of museums It ends with a practical toolkit gleaned from across the country for museum professionals to utilize

school a social incubator in a largely segregated city that was highly even improbably successful throughout its 156 year existence Established in 1855 as Central High School and reorganized in 1916 Schenley High School was a model of innovative public education and an ongoing experiment in diversity Its graduates include Andy Warhol actor Bill Nunn and jazz virtuoso Earl Hines and its prestigious academic program and pensions lured such teachers as future Pulitzer Prize winner Willa Cather The subject of investment as well as destructive neglect the school reflects the history of the city of Pittsburgh and provides a study in both the best and worst of urban public education practices there and across the Rust Belt Integrated decades before Brown v Board of Education Schenley succumbed to default segregation during the white flight of the 1970s it rose again to prominence in the late 1980s when parents camped out in six day long lines to enroll their children in visionary superintendent Richard C Wallace s reinvigorated school Although the historic triangular building was a cornerstone of its North Oakland neighborhood and a showpiece for the city of Pittsburgh officials closed the school in 2008 citing over 50 million in necessary renovations a controversial event that captured national attention Schenley alumnus Jake Oresick tells this story through interviews historical documents and hundreds of first person accounts drawn from a community indelibly tied to the school A memorable important work of local and educational history his book is a case study of desegregation magnet education and the changing nature and legacies of America s oldest public schools **Official Gazette** Philippines,2013 Get Out Now Mary Rice Hasson,Theresa Farnan,2018-08-14 Should we stay or should we go Millions of parents with children in public schools can t believe they re asking this question But they are And you should be asking it too Almost overnight America s public schools have become morally toxic And they are especially poisonous for the hearts and minds of children from religious families of every faith ordinary families who value traditional morality and plain old common sense Parents first duty is to their children to their intellect their character their souls The facts on the ground point to one conclusion get out now **Ambitious and Anxious** Yingyi Ma,2020-02-18 Winner 2021 Best Book Award Comparative and International Education Society Higher Education Special Interest Group Winner 2021 Best Book Award Comparative and International Education Society Study Abroad and International Studies Special Interest Group Honorable Mention 2021 Pierre Bourdieu Award for the Best Book in Sociology of Education Section on the Sociology of Education American Sociological Association Over the past decade a wave of Chinese international undergraduate students mostly self funded has swept across American higher education From 2005 to 2015 undergraduate enrollment from China rose from under 10 000 to over 135 000 This privileged yet diverse group of young people from a changing China must navigate the complications and confusions of their formative years while bridging the two most powerful countries in the world How do these students come to study in the United States What does this experience mean to them What does American higher education need to know and do in order to continue attracting these students and to provide sufficient support for them In **Ambitious and Anxious** the sociologist Yingyi Ma offers a multifaceted analysis of this new wave of Chinese students based on

research in both Chinese high schools and American higher education institutions Ma argues that these students experiences embody the duality of ambition and anxiety that arises from transformative social changes in China These students and their families have the ambition to navigate two very different educational systems and societies Yet the intricacy and pressure of these systems generate a great deal of anxiety from applying to colleges before arriving to studying and socializing on campus and to looking ahead upon graduation Ambitious and Anxious also considers policy implications for American colleges and universities including recruitment student experiences faculty support and career services
