Applying Dialogic Pedagogy Cynthia Z. Cohen, 2018-08-15 Recent academic research criticizes the effectiveness of traditional lecturing methods and instead shows the pedagogical effectiveness of active learning methods, especially discussion-based education. Drawing on the dialogic writings of Bakhtin, Freire, and Habermas, this study reviews the five primary themes cited in active learning research: improvements in student concentration, socialization in disciplinary norms, scaffolding towards higher critical thinking, inclusion of non-traditional learning styles, and reduction of student absenteeism. Testing these findings in a discussion-based undergraduate college education classroom, this study finds significant improvements towards higher critical thinking skills, increased student

concentration and reduced student absenteeism However the study finds questionable effectiveness of discussion based teaching for socializing undergraduate college education students in disciplinary norms
