**Knowledge Gap** Natalie Wexler,2019-08-06 Essential reading for teachers education administrators and policymakers alike **STARRED** Library Journal The untold story of the root cause of America s education crisis It was only after years within the

education reform movement that Natalie Wexler stumbled across a hidden explanation for our country's frustrating lack of progress when it comes to providing every child with a quality education. The problem wasn't one of the usual scapegoats: lazy teachers, shoddy facilities, lack of accountability. It was something no one was talking about: the elementary school curriculum's intense focus on decontextualized reading comprehension skills at the expense of actual knowledge. In the tradition of Dale Russakoff's *The Prize* and Dana Goldstein's *The Teacher Wars*, Wexler brings together history, research, and compelling characters to pull back the curtain on this fundamental flaw in our education system, one that fellow reformers, journalists, and policymakers have long overlooked and of which the general public, including many parents, remains unaware. But *The Knowledge Gap* isn't just a story of what schools have gotten so wrong; it also follows innovative educators who are in the process of shedding their deeply ingrained habits and describes the rewards that have come along for students who are not only excited to learn but are also acquiring the knowledge and vocabulary that will enable them to succeed. If we truly want to fix our education system and unlock the potential of our neediest children, we have no choice but to pay attention.

*Local Experiences of Mining in Peru* Gerardo Castillo Guzmán, 2020-02-05. This book uses a multimethod approach to examine the local experience of contemporary mining development in the Peruvian Andes, creating an understanding of the transformations that rural societies experience in this context. Mining is a major component of economic growth in many resource-endowed countries, whilst also causing mixed social, cultural, and environmental effects. Most current literature on contemporary mining in Peru is largely focussed on conflict; however, in this text, the author takes a differing approach by examining the experiences of families in the vicinity of Rio Tinto's La Granja exploration copper project, Northern Peru, an area with great significance due to the mining investment and development which has taken place over the past 25 years. The book first provides a critical discussion about production of space, theories and debates on spatial mobility, highlighting their relevance to understanding large-scale mining developments, especially in the Peruvian Andes. The following chapters analyze spatial transformations: mining development has prompted focusing on four axes: access to space, production, mobility, and representations of space. A comprehensive narrative is constructed, drawing on diverse voices and perspectives, including those of family heads and their partners, local leaders, company employees, and social scientists. The book concludes by discussing how the findings challenge some of the current accounts of the social effects of mining development on rural communities and pose significant implications for sustainable development programs and place-based practices. By taking an interdisciplinary approach, this book will appeal to a wide audience, including geographers, social anthropologists, and social scientists interested in the social effects of mining, as well as researchers interested in current Latin American Studies and Rural Development.
