The Budget of the United States Government United States. Office of Management and Budget,2015 **By Strength, We Are Still Here** Crystal Gail Fraser,2024-12-13 The first comprehensive study of Indian residential schools in the North In this ground breaking book Crystal Gail Fraser draws on Dinjii Zhuh Gwich in concepts of individual and collective strength to illuminate student experiences in northern residential schools revealing the many ways Indigenous communities resisted the institutionalization of their children After 1945 federal bureaucrats and politicians increasingly sought to assimilate Indigenous northerners who had remained comparatively outside of their control into broader Canadian society through policies that were designed to destroy Indigenous ways of life Foremost among these was an aggressive new schooling policy that mandated the construction of Grollier and Stringer Halls massive residential schools that opened in Inuvik in 1959 eleven years after a special joint committee of the House of Commons and the Senate recommended that all residential schools in Canada be closed By Strength We Are Still Here shares the lived experiences of Indigenous northerners from 1959 until 1982 when the territorial government published a comprehensive plan for educational reform Led by Survivor testimony Fraser shows the roles both students and their families played in disrupting state agendas including questioning and changing the system to protect their cultures and communities Centring the expertise of Knowledge Keepers By Strength We Are Still Here makes a crucial contribution to Indigenous research methodologies and to understandings of Canadian and Indigenous histories during the second half of the twentieth century **Budget of the United States Government** United States. Office of Management and Budget,2014 Colour and Light in the Ocean Victor Martinez-Vicente,Astrid Bracher,Didier Ramon,Shubha Sathyendranath,Tiit Kutser,2020-03-26 CLEO publications in Frontiers in Marine Science Foreword Josef Aschbacher Director of ESA s Earth Observation Programmes Satellite data have drastically changed the view we have of the oceans Covering about 70% of Earth s surface oceans play a unique role for our planet and for our life but large areas remain unexplored and are difficult to reach Since the 1980s Earth orbiting satellites have helped to observe what is happening at the ocean surface Sensors like CZCS AVHRR SeaWifs and MODIS provided the first ocean colour data from space Starting in 2002 ESA s Medium Resolution Imaging Spectrometer MERIS on board the environmental satellite Envisat provided detailed information on phytoplankton biomass and concentrations of other matter in the global oceans These satellite observations laid the groundwork for studying the marine environment and how it responds to climate change and the research community has since delivered information on the variability of marine ecosystems Part of this work is reflected in this stunning collection of peer reviewed publications presented at the workshop Colour and Light in the Ocean from Earth Observation CLEO held at ESA s ESRIN site in Frascati Italy on 6 8 September 2016 The event attracted more than 160 participants from all over the world including remote sensing experts marine ecosystem modelers in situ observers and users of Earth observation data Scientifically the meeting covered applications in

climate studies over primary productivity and ocean dynamics to pools of carbon and phytoplankton diversity at global and regional scales It also demonstrated the potential of Earth observation and its contribution to modern oceanography Looking to the future new satellites developed by ESA under the coordination of the European Commission will further our scientific and operational observations of the seas With Sentinel 3A in orbit and its twin Sentinel 3B following in 2017 there is a new category of data available for operational oceanographic applications and climate studies for years to come These data are free and easy to access by anyone interested Looking at the role of oceans in our daily lives I am sure that this collection of scientific excellence will be valued by scientists of today and will inspire the next generation to carry these ideas into the future
