- What would it be like to live in a world where everyone's dreams came true?
- Imagine that you are given the power to make any one of your dreams come true. Which dream would you choose? Write about the dream that is most important to you and why you would most want it to come true.
- Pick a natural landmark or a geographical feature and write an origin story about it from the perspective of one of the world's first civilized cultures. How did the landmark or geographical feature come to be? What does it represent? Why should it be important to humans?
- If you could go to space at some point in your life, what would you most like to see or experience? Choose anything in the universe and write about it—whether or not it would be realistic for a person to travel there!
- If you could invent any tool or new technology that would improve your life in some way, what would you create? What would it do? How would it work? When would you use it?

The public responsibility for higher education and research is a cornerstone of the European university heritage Yet our societies are changing rapidly and clinging to old solutions will not further the very values that these solutions were originally designed to protect The claim on public attention and public funds is growing but public funds are not or at least not at the same rate While public funding of higher education and research is still important the concept of public responsibility must be understood much more widely It must also be nuanced by looking more closely at different degrees and levels of public responsibility as well as at the instruments available for exercising such responsibility The book which builds on a Council of Europe conference aims to explore what public responsibility means in the complex societies that have just crossed the threshold to the 21st century by examining both overall higher education policies and specific aspects of it such as higher education for a democratic culture access to research results financing equal opportunities the approach to regulation and new trends in higher education
